Games Portfolio

Who is sitting in their bath in a cocktail dress?! Please!

I'm a tutor working for a big

company providing after-school booster sessions. In many respects, our sessions are completely gender neutral. Our role is to encourage all children, regardless of gender, to do their best and pursue their goals. At the end of their sessions, kids are allowed some downtime to play games or browse the internet. By far the most popular activity, despite my infinite but seemingly isolated enthusiasm for Pictionary, is the online entertainment platform, Friv.

Now, Friv is an apparently innocuous

and slightly naff collection of games like Supercow (collect super milk and superfluous coins!). Yet one day, as I was sitting with a girl, she opened up a "girls" game.

To be fair, Friv doesn't gender

segregate its games, at least on its homepage, which is a start. But the unmistakable shades of pink and lavender and the ubiquitous presence of doe-eyed kittens left the kids in no doubt as to which games they were supposed to

be playing. They ranged from the relatively harmless interior decorating and the frankly bizarre

"kitten-in-a-hot-air-balloon-delivering-groceries" vibe, to

the predictably irritating "feed-the-baby-and-cook-the-dinner" variety.

Unsurprisingly the choice of makeover games was alarmingly vast; "Bratz makeover" - makeover abnormally large-headed women to resemble Lindsey Lohan circa 2001; "Scary Lily makeover" - you're presented with a bald woman in pants and have to dress her in Mean Girls-style halloween costumes to music from the Crystal Maze; "Rapunzel Makeover" - Help! Rapunzel is hideously ugly! Help slay her whiteheads!; "Pinup facial beauty" - as creepy as it sounds given it's aimed at kids: a sexy woman in a little pink frilly number stands seductively while you ply her face with every product in the known universe. And you really feel they're scraping the barrel by the time it comes to "TV Anchor Makeover".

Screengrab from "Pinup Facial Beauty"  
So far so blah. However, there were a few games that really got my hackles up.

Take, for instance, "Back to School Makeover". Now, as an educational establishment, we tend to stress full stops and capital letters over eyeshadow and hoop earrings as tools for back-to-school preparation. But not in our downtime area.

In the land of Friv, the crucial back-to-school steps are illustrated by showing how utterly horrifying and gruesome it is to have acne, and how easy it is to get rid of it if only you support the multi-billion pound beauty product industry. Interestingly, bacne is not addressed.

Now, as a long term sufferer of acne I wanted to warn the kids playing that this was a wholly ignorant portrayal of the process of de-spotting oneself. First off, in the land of Friv, you have to use something that resembles a cross between a magic wand and an instrument of torture to remove the girl's icky puss-filled whiteheads. Then, after applying a scrub - with a brush?! - her spots have miraculously disappeared. (Who uses a brush to apply facial scrub, am I missing something? Maybe this is why I had acne...). I don't tell the kids playing the game that this is a load of old bull, however, as I'm too busy self-consciously patting my face and worrying about how I haven't plucked my eyebrows since before Christmas. If that's what these games do to a relatively confident adult, it can't be doing much for the self-esteem of the teenagers milling around the room.

Anyway, once you've wasted what seems to be several hours of this cartoon-girl's life slapping chemicals on her face the game ZOOMs in, in order to convey the full horror of unkempt facial hair which you must pluck in order to make her socially acceptable enough for the classroom. Next up comes the "Freshner". For several horrifying moments I thought we were about to enter the territory of 'vaginal freshening' products but thankfully no, this was just another chemical to pile onto the poor girl's face, albeit this time with a disembodied hand...

Still, at least this cartoon-teen got to use semi-recognisable products. Poor spotty Rapunzel's white heads get removed with what seems to be a syringe and a ribbon...

Meanwhile, it's time to makeover your impossibly doe-eyed cream-slathered beauty in time for double maths. Apparently it's now necessary to change her eye hair colour

give her a silly Shakespearian hat, all in the name of academic preparation.

And voila! At this rate, you'll only have to get up at 4am to make all the necessary preparations for school!

OK, I admit it, when I was a kid I'd probably have gone in for the makeover stuff too. Although admittedly for me it involved crimping my friends' hair and customising my B\*Witched inspired dungarees. Plus, it was usually in the spirit of fun, as embellishments, rather than attempts to remove imperfections. And frankly, having suffered with stubborn acne for years, I find the implication that I should have just washed my face and poked myself with a metal stick a bit insulting. Maybe you think I'm taking this too seriously, they are just games after all.

It's true, some of the games aimed at girls are just completely bizarre. "Cupid Forever" manages to blend Heston Blumenthal-style cooking with babies, romance, and fatal injury. Concoct a potion from perfume, cake, chilli, and burgers, and a flying woman will shoot a man in a park with an arrow, only for him either a) to turn into a baby and get carried away by a passing old woman, b) fart the woman next to him into oblivion, or c) get shat on by a pigeon. Not joking.

Perhaps it is all fun and games after all. But here's the thing - makeover games are clearly not just there for fun. There are obvious instructional and shaming overtones to these games which in my opinion make them quite insidious, and reflect some of the horrible expectations our society has of its young women.

But, if you need further convincing of the impossible standards these games are setting, here's a couple of screengrabs from some other makeover games:

Skinny enough for you? Incidentally, that last picture comes from a game called "Silky Smooth Legs" which is basically a step-by-step guide on how to shave your horrible shameful hairy legs whilst in the bath. Curiously, girls are never warned of the thrush risk involved with using multiple scented products near the vaginal canal. Odd, that.

But we're not done yet. The award for WORST GAME TO GIVE A YOUNG GIRL EVER goes to "Dream Date Dress-up"!

It goes like this:

A girl, let's call her Chloe, is clearly infatuated with some Bieber-haired twit. Ergo, she has to impress on their date.

Does Chloe instantly rush to the newsround website in order to brush up on current affairs and dazzle Bieber-tron with her wit? Does she have a frank and honest discussion with her parents about safe sex? Of course not, silly! Obviously she enters Bieber-tron's wank bank with her Kodak pervert lens and snaps a photo of his ideal woman in a swimming costume! Like, duh. Armed with this knowledge, the player then has to 'win' the game by totally altering Chloe's appearance in order to live up to Bieber-tron's sleazy little fantasy. Because it's totally healthy to teach girls that in order to make the guys they fancy like them back, they just have to cut and dye their hair and don an itchy-bitsy teeny-weeny yellow polka-dot bikini, in order to make themselves into someone else's fantasy. Not unhealthy in the least.

I had to play this godawful game for screengrabs with which to feed your dismay. I decided to dress Chloe in an Abba-chic-meets-Peggy-Patch look. Bieber-tron was not impressed, despite the fact that he'd not even bothered to put a shirt on. Bit rich. Poor Chloe was in tears because she hadn't reached the "target accuracy to go on the next date." I assume her misery was only increased by the fact that the makers of "Dream Date Makeover" had incorporated a print-out function, thus immortalising her shame forever.

Joking aside, what do we expect when we sanction games that promote impossible standards of beauty and coach girls to improve their looks, especially in an environment where we're supposed to be nurturing girls' brains rather than their bodies? The kids I work with are aged four to fourteen, and are a particularly high risk category for eating disorders and body dysmorphia. Yet we're implicitly telling them that maintaining an impossibly thin and unblemished figure is a fun, cool, and above all legitimate way to be spending their time.

I work with

young girls, and the ways in which they pick up the negative messages we send them about their future place in the world are highly upsetting. To quote one ten year old, a woman's role in a relationship is to be "three things: hot, hot, and hot."

She's by no means the exception, there was noisy agreement from the majority of the class, male and female alike.

To be fair, there are some almost positive portrayals of women on Friv, but you have to look quite hard. Despite the fact that Baby Clinic is aimed at girls because, you know, their role in life is to care for infants, at least there's a woman doctor

and they're doing something other than plucking eyebrows. In fact, they're making spooky-looking babies cry by administering polio vaccines. Then there's Epic Battle Fantasy. Praise the Lord! A game with a female action hero that battles mythical creatures (albeit whilst sporting knockers of gigantic proportion). But all in all, the choice for girls is pretty depressing. And what's more depressing, is the fact that this gaming site is sanctioned by countless education centres across the UK.

Há seis anos, Andrés Manuel López Obrador quebrou o controle dos partidos tradicionais do México sobre poder para se tornar presidente e prometeu remodelar um país devastado pela desigualdade.

A auto-descrito "Quarta Transformação" - que colocou o projeto de López Obrador bwin backup bet um nível com a Revolução Mexicana ea guerra da independência – ficou aquém dos seus objetivos elevados. Mas os índices do Lopez Obrator aprovação permanecem sólidas, por volta 65% e seu partido Morena parece certo para manter na Presidência!

A popularidade duradoura de López Obrador – conhecida coloquialmente por suas iniciais, Amló - reflete o sucesso principal do seu governo: a percepção da justiça socioeconômica.

"Primeiro, os pobres" é o slogan de campanha que Morena mais claramente entregou.

Uma mistura de aumentos salariais mínimos, subsídios e transferências diretas – às vezes bwin backup bet vez do financiamento dos serviços públicos - deixou muitos eleitores se sentindo melhor.

Enquanto isso, grandes projetos de infraestrutura como o projeto ferroviário do Trem Maia – apesar das críticas por bwin backup bet lógica econômica questionável e grande custo ambiental - são investimentos muito tangíveis para desenvolver as regiões historicamente mais pobres.

O fato de que os empresários mais ricos do México, como Carlos Slim ora fizeram muito dinheiro sob López Obrador passou despercebido ou é relativamente sem importância para muitos eleitores Morena.

Isso reflete a comunicação hábil de López Obrador, talvez melhor encapsulada pelas conferências diárias da imprensa conhecidas como as maaneras

, com o qual ele divulga as realizações de seu governo e incendia seus críticos bwin backup bet vôos extravagante.

"Eles são como um talk show, sustentado inteiramente por seu carisma e bwin backup bet capacidade de criar simpatia entre seus seguidores para com os adversários", disse Humberto

Beck. Ele se tornou o epicentro do ciclo noticioso mexicano".

Ao colocar a desigualdade no centro de seu discurso e tecer bwin backup bet reconhecimento simbólico dos grupos marginalizados, López Obrador "tem sido capaz para retornar grande parte da população à confiança na democracia", acrescentou Beck.

Quando se trata de segurança, fica claro que López Obrador não resolveu nada.

Isso criou uma base comprometida de apoiadores que, por enquanto parecem dispostos a ignorar as promessas não cumpridas do seu governo.

Corrupção e impunidade não são melhores do que quando López Obrador assumiu o poder. Seu governo, como os anteriores a ele teve escândalos de corrupção - Enquanto isso A justiça permanece distante até mesmo para crimes mais importantes – tais quais 43 estudantes da escola Aiotzinapa desaparecido à força!

Embora a taxa de homicídios tenha caído ligeiramente durante os últimos anos do governo López Obrador, o México já viu mais que 30.000 assassinatos cada um dos seis últimos. Sua proporção ainda está entre as maiores da América Latina

Em agosto de 2024, o diretor da comissão nacional para buscas renunciou ao cargo citando a pressão por reduzir as crescentes pessoas desaparecida e que se tornaram politicamente prejudiciais.

"Quando se trata de segurança, fica claro que López Obrador não resolveu nada", disse Guadalupe Correa-Cabrera. "Esta administração viu mais homicídios do que os dois anteriores e isso faz parte dum ciclo vicioso mas você pode simplesmente culpar as outras pessoas sem assumir a bwin backup bet própria culpa."

Enquanto isso, apesar da promessa de López Obrador para devolver os soldados aos seus quartéis o exército tem visto seu papel se expandir bwin backup bet muitas áreas anteriormente reservadas à sociedade civil como segurança doméstica e construção das infraestruturas.

As implicações disso ainda estão por resolver, mas as atividades militares não são mais do que o escrutínio democrático.

"Eles não calcularam bem isso", disse Correa-Cabrera. "As administrações chegam ao fim, Morena parece que vai ter um segundo mas terceiro? Quem sabe e os militares vieram para ficar."

Esta militarização, juntamente com os ataques de López Obrador contra instituições que se opõem a ele puseram bwin backup bet evidência o alarme da oposição sobre as ameaças à regressão democrática.

O México tornou-se uma democracia bwin backup bet 2000, depois de 71 anos do governo unipartidário pelo Partido Revolucionário Institucional – um dos partidos agora na coalizão da oposição.

"As críticas da oposição estão, bwin backup bet certo sentido corretas", disse Beck. Mas então suas próprias credenciais democráticas não são impecáveis e ainda representam as forças que López Obrador triunfou: uma visão estreita oligárquica ou corrupta de democracia".
