contente:

Calor vs. Bulls espalhar::Calor calor calor -4. Calor vs. touros sobre/abaixo: 216 pontos.

Ele não estava pronto para se tornar um gerente geral ou um proprietário ou sentar e começar a aposentadoria. Ele Não queria reconstruir ou reequipar ou admitir uma coisa. Acredite Jordan quando ele diz, como ele fez no episódio 10 de The Last Dance, E-mail: \*Nós poderíamos ter ganho. Sete.

Yes cool, a favorite project of mine too for a year now from time to time . It offers nice insight.

Also notice you need to consider antes as this makes it even more interesting and realistic.

You also need to use ICM to see if this is right though for some of the totally trashy hands in the bottom 10-20%. Clearly when you shove with stupid hands like 23 or 74 or even T2 you have near 26% equity when called . And you will be called 13% of the time from 10% ranges for example due to the removal effect from others having folded to the blinds (more aces left on the deck and good Kings to a serious degree actually) . Anyway you will indeed have a net plus EV result in chips but if your stack is 20bb when you do such things and you are a very good player you actually are risking 14bb to win something like 0.6-0.7bb on that move on avg. Now that is significant but so is using your 14bb on a QQ or KK or AA or AK a few hands later when there is potential dead money at the pot for much higher benefit per risk taken and also all the other lucrative situations a good player can spot better (and which are no longer lucrative if the table thinks you are a stealing bully) . Here say 10% of the time you lose 14bb (13% times 74%) . Notice that due to the nonlinearity of the tournament equity function it matters when you take big risks that can crash your equity in order to only slightly improve it the rest 90% of the time.

Maybe a big raise

say 4-5bb is as effective vs a 14bb stack since he needs to go all in really , he cant just call you and if he does go all in and you can imagine he is still on some 10-20% range these trashy hands are still around 28-30% equity. If he indeed goes all in with 10-15% of hands then (why would that be any radical difference further from the range he calls full all ins?) you might be able to fold and save 10bb since  $10/(14+14+0.75)=35\%$  and you really dont have that with trashy hands against even a full 20% range. In fact probably a great deal as much as 35% of the bottom hands are folded easily in this case. That probably will elevate the EV of the "stealing" move. Plus he may even on occasion just call and you can hit some of these flops with a 5-6% miracle or even just a top pair . Its hard to imagine why one would flat call with over 30% of their stack (unless on AA, KK etc trapping which is also debatable if its good idea) but some strange people do it.

Plus clearly you will be doing all kinds of better things with your top hands anyway. If one can indeed refine the action with the junky hands and have it ICM approved then its probably right to be that audacious.

But i still

reserve some hesitation on such moves that are very bold in tourneys that you hold some reasonable edge in skill over the majority of the players left which in itself gives you a much higher tournament equity function and much more serious bias against moves that can potentially devastate you. My point is one shouldnt be making it that easy for others possibly of inferior skill to inflict a massive blow to his/her stack. Imagine if the guy is some pissed off crazy idiot that thinks you are bullying him -and you do in fact- (and he likes coin flips in his mind) and he calls you with 30% of his hands. Those low end trashy hands will still be only near 30 to 32% vs this wider range. It will be coming 35-40% too due to the levated AX,KX premium hands (removal effect mentioned earlier). So it will then be more

like

$$(0.32*(14*2+0.75)=4.8)$$

$$0.65*1.75-0.35*4.8=-0.54bb \text{ almost the same as folding the sb.}$$

That big size raising option may be in fact a better alternative. In the minds of some intelligent players it may even sound more threatening than the all in is for clearly the guy is thinking why would you be doing all in with AA, KK, QQ etc and risk no action.

## **Fale sobre a morte de Richard Sherman, um dos irmãos Sherman**

Richard Sherman, um dos irmãos da premiada dupla que escreveu as músicas memoráveis de filmes como Mary Poppins, O Livro da Selva e Chitty Chitty Bang Bang, morreu aos 95 anos. Junto com o falecido irmão Robert, Richard ganhou dois Óscares por Mary Poppins – melhor trilha sonora e melhor canção, "Chim Chim Cher-ee". Também receberam um Grammy por melhor trilha sonora de filme ou TV.

## **Sucesso na Disney**

Os irmãos Sherman escreveram centenas de músicas, incluindo as trilhas sonoras de filmes como Winnie the Pooh, The Slipper and the Rose, Snoopy Come Home, Charlotte's Web e The Magic of Lassie. Eles também escreveram a música "It's a Small World (After All)", que se acredita ser a música mais tocada do mundo.

## Reconhecimento e Legado

Os irmãos Sherman ganharam 23 álbuns de ouro e platina e uma estrela na Calçada da Fama de Hollywood. Eles foram premiados com a Medalha Nacional de Artes lakers bulls best bet 2008 pelo presidente George W. Bush, lakers bulls best bet reconhecimento à lakers bulls best bet música que "ajudou a trazer alegria a milhões de pessoas".

A maioria das músicas dos irmãos Sherman é cativante e divertida, e possui vários níveis de interpretação para diferentes idades, uma lição que aprenderam com Walt Disney.

Os irmãos Sherman começaram a trabalhar com a Disney na década de 1960 e escreveram mais de 150 músicas, incluindo as trilhas sonoras de filmes como The Sword and the Stone, The Parent Trap, Bedknobs and Broomsticks, The Jungle Book, The Aristocrats e The Tigger Movie.

A música "It's a Small World" é uma das composições mais tocadas do mundo e pode ser ouvida lakers bulls best bet passeios de barco lakers bulls best bet parques temáticos da Disney.
