Some bets in American Roulette have an even higher house edge than the 5.26% average. For example, a bet on the Five Numbers (0, 00, 1, 2, 3) carries a house edge of 7.89%. Outside bets in roulette carry the lowest risk. They cover more numbers yet the payouts are lower (1/1 for Red, Black, Odd, Even, 1 18, 19 36).

PayPal Quick Registration, a faster way to play

Pay'n play casinos have been a

Nordic staple for years. Now UK players get to enjoy this same great service with the help of PayPal Quick Registration.

Quick Registration combines the part where you need

to create your casino account and the actual depositing into one quick procedure. This way you can start playing faster and need to worry less about putting in all your personal details.

Using Quick Registration is very easy and anyone can do it.

How to

use PayPal Quick Registration:

Click Quick Registration button on the sign up page

Choose the amount you want to deposit Add promo code, set deposit limits and choose if you want the casino to remember your PayPal details Click Deposit Using PayPal button

Insert your email or phone number you have set in your PayPal account Put in your PayPal password Confirm the transaction

Now you can start playing on the casino with the money you just deposited and with the account you just created.

How this works is that you

are basically giving PayPal the permission to hand out your name, address and phone number to the casino, who will then create a player account with those information. The casino may still need to ask you for documents when you make withdrawals just like with a regular player account.

PayPal Quick Registration is still rare and can only be found

on a handful of casinos. You can use our casino selection tool to find UK pay'n play casinos by choosing the Quick Registration filter.
