glamour slot : Descubra os presentes de apostas em mka.arq.br! Registre-se e receba um bônus de boas-vindas para começar a ganhar!

conteúdo:

A signal is emitted when a particular event occurs. Qt's widgets have many pre-defined signals, but we can always subclass to add our own. A slot is a function that is called in response to a particular signal.

[glamour slot](#)

Signals and slots are loosely coupled: A class which emits a signal neither knows nor cares which slots receive the signal. Qt's signals and slots mechanism ensures that if you connect a signal to a slot, the slot will be called with the signal's parameters at the right time.
