Broad Strategy View

Hand Specific View

I want to look at

the following hand through two different lenses. 1) Through the lens of broader strategy. With regard to minimum defense frequency and dividing my whole range I am

playing in this spot in different parts for different actions. 2) Through a hand specific lense. What is best with this certain hand in this situation, vs the estimated range of Villain. PokerStars, -R\$0.02/\$0.05 - 5 players UTG (Hero): R\$11.96 (239 bb) CO: R\$3.37 (67 bb) BU: R\$17.41 (348 bb) SB: R\$4.29 (86 bb) BB: R\$5.00 (100 bb) (\$0.07) Hero is UTG with J, SB calls R\$0.13, (\$0.35) ASB checks, (\$0.35) K, SB calls R\$0.35 (\$1.55) JSB checks, \$1.55 (Rake: R\$0.06) UTG (Hero) wins R\$1.49 My standard opening range from HJ on a table like this, where there is no clear reason for adjustments looks like this: 66+, A2s+, KT+s, QT+s, JT+s, T9s, 98s, 87s, ATo+, KJo+ First problem I have in this hand is estimating SB's calling range. For an opponent who also 3bets some I came up with this: JJ-77, AQs-A9s, KT+s, QT+s, JT+s, T9s, 98s, AQo-ATo, KJo+, QJo+ With the flop coming AI want to figure out, which parts of my range I want to bet and which parts I want to check. Generally my approach is betting the strongest hands, hands that have equity on the flop but need a ton of protection and my weakest hands which still have some equity. I figured looking at our equity heatmap might be interesting. After looking at the heatmap, I came up with this plan for betting and checking with our range: red = betting 88-66, AdAh, AdAc, AhAc, ThTs, ThTc, TsTc, AdKd, AhKh, AcKc, AdQd, AhQh, AcQc, KcQc, AdJd, AhJh, AcJc, KcJc, QdJd, QsJs, QcJc, AhTh, AcTc, KcTc, Ah9h, Ah8h, Ah7h, Ah6h, Ah5h, Ad4d, Ah4h, Ah3h, Ah2h, KJo, AdKh, AdKs, AdKc, AhKd, AhKs, AhKc, AcKd, AcKh, AcKs, AdQh, AdQs, AdQc, AhQd, AhQs, AhQc, AcQd, AcQh, AcQs, AdJh, AdJs, AdJc, AhJd, AhJs, AhJc, AcJd, AcJh, AcJs, AdTh, AdTs, AdTc, AhTs, AhTc, AcTh, AcTsother = checking KK-JJ, 99, 98s, 87s, KdQd, KhQh, KsQs, KdJd, KhJh, KsJs, QhJh, KhTh, KsTs, QhTh, QsTs, QcTc, JhTh, JsTs, JcTc, Ad9d, Ac9c, Th9h, Ts9s, Tc9c, Ad8d, Ac8c, Ad7d, Ac7c, Ad6d, Ac6c, Ad5d, Ac5c, Ad3d, Ac3c, Ad2d, Ac2c, KQo+ So we would bet 59% and check 41% of our range. As you can see, JJ would be in the checking range, so I'm fine with my in game decision. Other reasons are, that it is probably pretty close on a Broadway heavy rainbow board to get a value bet vs Villain's calling range. Depending on what he continues with we have at max 52% equity vs his continuing range. Other than that, if we get x/r'ed there is probably no way to continue and Villain would be able to deny us all of our equity. Turn comes the K Not to good for our checking range on the flop as we lose as massive amount on this turn card. Villain bets 71% pot so we have a MDF of 41%. So looking at our heatmap again to construct raising, calling and folding ranges. Could come up with a plan like this: red = raise KdKh, KdKs, KhKs, QhJh, Ac9c, Ac8c, Ac7c, Ac6c, Ac5c, Ac3c, Ac2c brown = call QQ, KdQd, KhQh, KsQs, KdJd, KhJh, KsJs, KhTh, KsTs, Ad9d, Ad8d, Ad7d, Ad6d, Ad5d, Ad3d, Ad2d, KdQh, KdQs, KdQc, KhQd, KhQs, KhQc, KsQd, KsQh, KsQc blue = fold JJ, 99, 98s, 87s, QhTh, QsTs, QcTc, JhTh, JsTs, JcTc, Th9h, Ts9s, Tc9c This would leave me at 64% of my range I am defending but with card removal effects this hits exactly 41%. So from the lense of broader strategy, calling JJ here is probably a mistake. Nothing to add, still a standard open from this position. If I would bet on this flop, which part of Villain's range would call a bet? This is something I'm still struggling with, but let's give it a try. yellow = call JdJc, ThTs, ThTc, TsTc, KQs, AdQd, AhQh, AcQc, AdJd, AcJc, KdJd, KcJc, QdJd, QcJc, AhTh, AcTc, KhTh, KsTs, KcTc, QhTh, QsTs, QcTc, JcTc, Ad9d, Ah9h, Ac9c, Th9h, Ts9s, Tc9c, KQo, AdQh, AdQs, AdQc, AhQd, AhQs, AhQc, AcQd, AcQh, AcQs, AdJc, AhJd, AhJc, AcJd, AdTh, AdTs, AdTc, AhTs, AhTc, AcTh, AcTs, KdJc, KhJd, KhJc, KsJd, KsJc, KcJd, QdJc, QhJd, QhJc, QsJd, QsJc, QcJd I guess he calls all TPs, Ts, GS and JJ and gets rid of underpockets and 98s. I hope this is reasonable. Vs this range we do clearly not have a value bet w/ JJ as we only have 44% equity. So I guess check is the best option. Also we do have a decent amount of showdown value and depending on T and R we might be able to get to SD ahead and don't want to overplay this hand. The K on the turn helps him immensely. Also I think he could take a stab at the pot with close to his entire range. We do have 6 outs vs his pairs and two pairs and sets of TT and 3 to chop if he holds QJ (which we block). I'm really kind of lost in this spot, don't know if we can call or it's always a fold. But I'm pretty sure that raising is not the best option. Problem with raising is,

that we isolate ourself vs his better hands. This is what I see him calling definitely: brown = call ThTs, ThTc, TsTc, QdJd, QcJc, AhTh, AcTc, KhTh, KsTs, AdTh, AdTs, AdTc, AhTs, AhTc, AcTh, AcTs, QdJc, QhJd, QhJc, QsJd, QsJc, QcJd This is what he could call if he is not only calling two pair+ThTs, ThTc, TsTc, AdQd, AhQh, AcQc, KdQd, KhQh, KsQs, AdJd, AcJc, KdJd, QdJd, QcJc, AhTh, AcTc, KhTh, KsTs, Ad9d, Ah9h, Ac9c, AdQh, AdQs, AdQc, AhQd, AhQs, AhQc, AcQd, AcQh, AcQs, AdJc, AhJd, AhJc, AcJd, AdTh, AdTs, AdTc, AhTs, AhTc, AcTh, AcTs, KdQh, KdQs, KdQc, KhQd, KhQs, KhQc, KsQd, KsQh, KsQc, KdJc, KhJd, KhJc, KsJd, KsJc, QdJc, QhJd, QhJc, QsJd, QsJc, QcJd Against either continuing range we're crushed. In the first case we would at least have enough FE, but I doubt that he calls that tight on my (too) small raise. Rivering a set usually is nice. But here there is just no way we do have a value bet against his calling range. We do not even have a value bet against his whole range OTR. So I guess the best play would have been to check behind and get to SD with the best hand a good amount of the time. Played it right on 50% of the street. Bad play on Turn and River, just got lucky. Gotta think more about why I'm betting in game and about if I have value FE or whatever to justify my bets. Also gotta do some serious work on bet sizes. Just a mess at the moment. I know it's a wall of text and probably pretty convoluted, but I wanted to share with you how I work through a hand if I really think about it in depth. Maybe someone spots some logic flaws or misconceptions, then I'd be more than happy if you call me out. (wouldn't be surprised if nobody wants to read that much text though) Now on to the review of yesterday's session and then to the tables. See y'all and GL
