Slots Meaning & Symbols

The first thing

you'll notice on any Betfair slot is the variety of different symbols. Every one of these games is built around a series of symbols that help you understand the gameplay and what you need to do to win. The game's paytable will explain the full details behind how they work and what they can get you. Let's cover the basics:

Paying symbols:

These are the {img} that give you cash wins when you get a combination of them across the reels. The top-paying symbols are often the key {img} in the theme – such as a sheriff's badge in a Wild West slot or a fishing boat in a fishing-themed game – while the lower-paying symbols may be more generic, like playing card symbols. Wild symbol:

This is a special image that acts as a substitute by replacing any paying symbol to complete a win. In some cases, it may have special powers, such as the ability to add multipliers or remain on the screen for several spins. You can even find slots with more than one wild symbol in them.

Scatter symbol: This image has the benefit of paying

a win whenever you get the right number of them anywhere on the screen, while normal paying symbols generally have to land on paylines or next to each other in order to trigger a reward. Scatters are also commonly used to trigger free spins when you land enough of them on a single spin. This makes them arguably the most important image, as the free spins round is where the biggest wins can be claimed in many slots. Other

bonus symbols: As online slots become increasingly diversified, the number of types of bonus symbols continues to grow. There are now symbols that lead to bonus games, others that collect the cash amounts shown on-screen and so on. This is why you should check the paytable before playing if you want to see exactly how the game works and the different ways you can win.

How to Play Online Slots

Check out our Betfair slots lobby

and you'll see hundreds of games, but one of the advantages they all offer is that they're so easy to play you don't need to learn a new set of rules and gameplay every time. Stick to the following steps and you can play any online slot simply.

Choose your

bet level: The exact approach varies, as in some cases you pick from a sliding scale while in others you use + and – buttons to get to the amount of stake you're comfortable with.

Some slots have an adjustable number of paylines and the number you choose will affect the stake.

Press the spin or start button to put the reels in

motion. They'll then stop randomly and you'll see the symbols you've landed.

If the

symbols land on a winning combination, you'll receive the appropriate payout automatically and instantly.

If you trigger a bonus feature – such as free spins or a

mini-game – you'll be advised whether you need to press the spin button or carry out some other action. If not, the game will continue automatically and you'll be notified of any further wins.

Always remember to stay safe and use the responsible gambling practices that we encourage. Everything we do is designed to give you an enjoyable, secure slots experience and you'll find a range of tools and resources on our site to help you in this respect.
