Funkmaster: Slot Overview

Hopefully, you're feeling energetic players because developer

NetEnt is cranking up the sounds and getting all groovy with Funk Master, a cluster paying grid slot with a gleaming 70s vibe. You can see why software providers are keen to use this theme. Banging tunes are a key draw, well, toe-tapping tunes at least, so are the bright lights and the feel-good party time vibe. Funk Master has bottled all of this and serves it up alongside such features as avalanches, Dancing Wilds, Dancing Wild Hotspots, multipliers, and free spins.

Mention a cluster paying grid slot with a

disco setting, and it's difficult not to compare the game to Push Gaming's benchmark release Jammin' Jars. On a visual basis, Funk Master is quite similar to Jammin' Jars in that the background in both slots is made up of a collection of bright lights, while the action occurs on an 8x8 sized grid. One difference in Funk Master is its game panel can grow in size when the right features are activated. All in all, Funk Master lives up to its name in terms of theme, as the sensory impact is indeed a funky one. The tune used for the game is Doo Wa Ditty (Blow That Thing) by Zapp, which is so infectious you're bound to have last song syndrome.

Moving onto the less-cool, perhaps, though no

less important side of Funk Master - its numbers. The game has more than one RTP setting, defaulting at 96.04%, though dropping to 92.06% for German players looking to get jiggy. Volatile is high, no matter what, while hit frequency comes in at 27.76% at the default return setting. That's a pretty regular figure, though a higher-than-normal free spins trigger frequency of 1 in 397 means plenty of waiting around until the beat drops. Playable on a tablet, desktop, or mobile device, players partake of Funk Master by selecting bets of 20 p/c to R\$/€200 per paid drop.

Hit the play button, and 64

symbols drop onto the game panel, forming wins when matching symbols land in horizontal or vertically adjacent positions. Winning clusters trigger the avalanche feature, which removes winning symbols and replaces them with new ones until no new cluster hits.

NetEnt must believe you can't have a party without a disco ball, as all of the regular paying symbols are disco balls of varying colours – blue, purple, and green as the lows, pink, green, yellow, and orange as the highs. Disco balls also appear on the wild

symbols, leaving scatters and multipliers as the other symbols you'll encounter in Funkmaster.

#### Funk Master: Slot Features

Funk Master makes use of several extras to get the shindig pumping. As well as avalanches which we looked at are Dancing Wilds, Dancing Wild Hotspots, Multiplier Symbols, and free spins.

#### Dancing Wilds

##### Dancing Wilds

land in any position in the base or bonus round to help complete winning clusters by substituting for any pay symbol type. When used in a win, Dancing Wilds remain on the board and move to an adjacent empty space to potentially help complete more winning clusters.

#### Dancing Wild Hotspot

At the start of each base game spin, a 2x2 sized square called the Dancing Wild Hotspot is placed in a random position on the game grid. If a win hits with one or more symbols in the Hotspot, the respective positions are unlocked. If all 4 squares in the Hotspot are unlocked, a Dancing Wild is awarded.

#### Multiplier Symbols

Multiplier symbols can appear in the base or bonus game, carrying values of x2, x3, x5, or x10 and are applied to the current win total. If more than one multiplier symbol hits, the values are summed before being applied.

#### Free

##### Spins

Landing 3 or more Dancing Wilds simultaneously awards 6 free spins. All triggering Dancing Wilds remain on the grid for the full duration of the bonus round. Also, in free spins, the Dancing Wild Hotspot is 3x3 in size. If all positions are unlocked in free spins, +2 Dancing Wilds are added, and +1 extra row is placed on the game grid – up to a maximum of 12 rows high.

#### Bonus Buy

Players itching to cut a rug can

buy their way straight to the bonus round, where available. The cost is 125x the bet and gets you 6 free spins.

#### Funkmaster: Slot Verdict

Someone at NetEnt must have a

penchant for bopping at the disco since Funk Master isn't the studio's first trip back to the groovy era. Disco Danny was one previous exploit, which actually started life as Disco Monkey before being recast with a human lead. Funk Master is a completely different type of slot, though, and its key competitor has got to be Jammin' Jars and, by extension Jammin' Jars 2. It was always going to be tough taking on such a classic slot, and in a dance-off, Funk Master puts up a pretty good fight but fails to outdo Push Gaming's mega-hit.

Pinning down exactly where Funk Master comes up short is the max win potential. The game's got a juicy mix of clusters, avalanches, persistent wilds, and the occasional multiplier, so it's more a case of simply being outclassed in terms of potential than doing something criminally wrong. Theme treatment is extremely satisfying, though some might feel a slight disco ball overload going on, and the lack of a personal touch possibly holds Funk Master back. There's certainly no amusing Disco Danny leading man nor infuriatingly cute jars. Instead, the game has something soullessly corporate about it, which gives off a modernistic vibe rather than a spirited 1970s free for all one.

At the end of the day, it wouldn't have hurt if the

potential had been higher, as it could have knocked the game out of the ballpark.

Adding multipliers values rather than multiplying them limits their effectiveness, leaving winning possibilities max out at 3,337x the bet, which is noticeably less than a lot of games Funk Master is going up against. Funk Master does bring a good level of funk through its collection of workable features, but we're not sure it's quite the master of funk it makes itself out to be. While it is a polished and phenomenally executed production overall, Funk Master is more a follower of fashion than a fearless trendsetter - a pretty and thoroughly entertaining one, though, it has to be said.

## **La transformación de la presión en irritabilidad: ¿cómo la generosidad puede ayudar**

Al igual que muchas personas, encuentro que el estrés me transforma en una fea combinación de Oscar el Gruñón y el Tío Gilito. Cuanto más presión siento, más irritable me siento, y menos generoso me vuelvo. En parte culpo a nuestra cultura. He leído suficientes consejos de bienestar como para saber que necesito priorizar mis propias necesidades sobre las de los demás. Y, por lo tanto, cuando me siento bajo presión, he adoptado el hábito de practicar pequeños lujos destinados a restaurar mi equilibrio mental, aislándome de los compromisos sociales esenciales. Después de leer la última investigación psicológica, no puedo dejar de preguntarme si esta actitud solo exacerba mi mal genio. Un gran número de nuevos estudios ha demostrado que ser amable con los demás es a menudo el medio más eficaz para suprimir la respuesta fisiológica y psicológica al estrés. Ya sea que estemos dando nuestro tiempo a una organización benéfica, "devolviendo el favor" en una cafetería o proporcionando apoyo emocional a un amigo necesitado, la altruismo puede mejorar nuestro bienestar de maneras que simplemente no experimentamos al tratarnos a nosotros mismos. El cuidado de los demás, parece, es a menudo una de las mejores formas de cuidado personal.

## **El poder del voluntariado**

Mi interés como escritor científico se despertó por una serie de documentos que examinan la sorprendente vitalidad de los voluntarios. A lo largo de cientos de estudios, los científicos han encontrado que participar en un trabajo no remunerado para el bien de los demás brinda un notable impulso al bienestar. Estos incluyen un mayor sentido de significado y propósito, más autoestima, una satisfacción vital más alta y un riesgo reducido de depresión. Increíblemente, incluso parece reducir el riesgo de muerte.

<b>Beneficios del voluntariado</b>	<b>Descripción</b>
Mayor sentido de significado y propósito	Los voluntarios a menudo informan un mayor sentido de significado y propósito en la vida.
Más autoestima	El voluntariado puede aumentar la autoestima y la confianza en uno mismo.
Mayor satisfacción vital	Los voluntarios a menudo informan una mayor satisfacción vital.
Reducido riesgo de depresión	El voluntariado se ha relacionado con un riesgo reducido de depresión.
Reducido riesgo de muerte	Algunos estudios han encontrado que el voluntariado se asocia con un riesgo reducido de muerte.

Un estudio mostró que dar apoyo parece crear un agradable cosquilleo de placer mientras amortigua los sentimientos de estrés

En estudios a gran escala como estos, siempre es posible que exista un tercer "factor de confusión" que explique la aparente relación. Los voluntarios pueden estar en mejor forma antes de comenzar sus empresas altruistas, por ejemplo. "La salud es un recurso que nos permite participar en la sociedad", explica el Prof. Arjen de Wit, un sociólogo de la VU Ámsterdam.

Los científicos han intentado controlar estas posibilidades, y sin embargo, un resultado significativo permanece. Un metanálisis reciente, por ejemplo, evaluó los efectos del voluntariado en personas de 65 años o más, de 26 de los estudios de mayor calidad disponibles. Concluyó que el voluntario promedio tiene una probabilidad del 57% de sobrevivir a la persona promedio que no hace voluntariado.

Arjen de Wit, un sociólogo de la VU Ámsterdam, cree que los beneficios de ayudar a otros pueden ser acumulativos.

Una gran investigación dirigida por De Wit, que abarca datos de más de un cuarto de millón de participantes europeos, sugiere que los beneficios pueden ser acumulativos. "Si tiene un efecto año tras año en su salud, entonces puede sumar si sigue haciendo voluntariado, y eso puede marcar una diferencia, especialmente para las personas mayores", dice.
