After 1.1 million plays in soft launch and countless updates, Vortelli's has finally

been released globally on Poki. You can play it here:

//poki/en/g/vortellis-pizza

My Journey with PlayCanvas

I started working with

PlayCanvas in July of 2024. After one year of on and off work, I released a playable

version of Vortelli's in mid-July 2024. After having spent so long working on the same project, I had no idea if it was any good. It received a small amount of attention from

Twitter and the PlayCanvas forums. Around the same time, I sent a demo to Poki. I was absolutely delighted to learn that the Poki team loved the demo and wanted to work with me! I signed their publishing agreement and over the next few weeks, I worked with them

to integrate their API and monetize the game with ads.

At the end of August, Vortelli's

was soft launched in a few test regions, Brazil, France, Italy, Sweden and Turkey. This

was my first time launching a game at scale and I had no idea what to expect. On the

first day, my eyes were glued to the stats dashboard and I kept checking my game server

logs over and over. I didn't get much actual work done that day! The player count

peaked at 12 on the first day of soft launch.

The next day, I noticed a worrying

netcode bug and players were leaving angry reviews complaining they couldn't click on

anything in the game. After hours of stressful debugging, I found a time code bug in

the netcode I'd written where players with low spec devices were sometimes getting

desynced and weren't able to interact with objects in the game world. In a mild panic,

I managed to implement and deploy a fix. I learned that the dt variable can drift over

time making it unsuitable for precise time keeping, use performance.now() instead.

Unfortunately that was just the start of my problems.

The next morning I was woken up

around 4:30am by a notification that all the servers were completely full. At this

point I had two servers, one in Dallas USA and another in Frankfurt Germany, each

capable of supporting 40 players. At first, I thought this was a bug and maybe

departing players weren't getting disconnected correctly? Unsure, I created two more

servers and within minutes they were also completely full. Vortelli's somehow had 160

players online! I kept creating new servers and they seemed to be filling up as quickly

as I could launch them. This was not a bug, Vortelli's has been featured on the front page of Poki and there were thousands of new players finding my game. I believe Poki's system automatically moves games with strong user engagement to the front page.

Eventually the player count settled down and I got to work on automating the server scaling. I knew I couldn't wake up at 4:30 every morning to manage servers. I used Linode's API to automatically create new servers as the player count increases and then automatically shut them down as the player count decreases. I didn't get this 100% perfect on my first try, there was at least one time when I accidentally shut down servers with players still on them. My apologies if you were one of them.

Over the next

few weeks, I worked to fix bugs and implement some new features. There were all kinds of helpful suggestions from the PlayCanvas community, Twitter and the Poki team. During the soft launch period, Vortelli's was played 1.1 million times.

PlayCanvas has proven

to be very reliable, especially across multiple devices of varying specs. Uploading PlayCanvas builds to Poki is very simple. In the PlayCanvas editor, I can simply download a .zip of my entire project, then upload the same .zip into Poki's developer dashboard.

PlayCanvas and Poki work well together when it comes to error tracking. The Poki dashboard maintains a live feed of the console errors coming from players' browsers. PlayCanvas provides very clear error messages containing script file names and line numbers, even in exported builds which has made it very easy to track down issues even in production.

Despite the occasional stressful situation, this has been a really fulfilling project. I have a few Vortelli's updates planned and of course I'm open to suggestions from the community. If you have any questions about Poki/PlayCanvas, please let me know, I'll do my best to help!

Afin de célébrer le Ramadan réuni avec ma famille, je suis rappelée que le mois saint a des leçons pour nous tous

Par Shadi Khan Saif

Parfois, je pense que l'entièreté du point de la religion est d'aider les hommes à se comporter plus comme des femmes.

Les membres d'une communauté religieuse sont censés s'entendre les uns avec les autres, même s'ils ne s'aiment pas. Mais les femmes n'ont pas besoin de règles religieuses pour leur apprendre les bonnes manières sociales. Dès la naissance, nous sommes socialisées pour prioriser les besoins du collectif au-dessus des nôtres.

Des leaders spirituelles qui nous inspirent

La plupart des religions majeures du monde reconnaissent les hommes comme leurs fondateurs. Par exemple, le christianisme a été fondé par Jésus, le Bouddhisme par Siddhartha Gautama et l'Islam par Muhammad. Ils étaient des hommes qui n'avaient pas besoin de trouver du temps pour leur spiritualité entre la préparation des dîners et la participation à des réunions de travail. Mais je veux un modèle spirituel qui aurait compris comment désamorcer une crise à la sortie de l'école chaque jour. Alors, qui sont les femmes leaders spirituelles?

En raison de mon éducation chrétienne, mon point de départ naturel est Marie, la mère de Jésus. Les Chrétiens croient que Jésus était Dieu incarné. Pour maintenir le statut divin de son fils, les théologiens de l'Église primitive ont décrit Marie comme une vertueuse vierge qui a conçu Jésus "immaculément", sans fluides corporels requis.

Plutôt que de me prosterner aux pieds d'une femme avec un utérus magique, je suis attirée par sa cousine moins connue, Élisabeth. Une Marie enceinte et sans mari s'est rendue dans les collines pour chercher les conseils d'Élisabeth. Élisabeth était une femme plus âgée qui s'était crue incapable de concevoir, mais elle était enceinte de six mois lorsque Marie est arrivée à sa porte. Je m'imagine Élisabeth entendant les nouvelles de Marie, et criant de la poésie à sa cousine, l'aidant à croire que l'enfant de Marie, aussi légitime soit-il, était un miracle.

"Salut Marie", peut-être qu'Élisabeth a dit, en entendant les soucis de la jeune femme. "Tu es comblée de grâce! Bénie sois-tu, et béni soit ton enfant. Tu es un chaînon dans une chaîne de femmes magiques, serpentant jusqu'au commencement, les femmes qui mettent le monde au monde. Marie, tu es une mère de toutes les choses innombrables." Je ne peux qu' supposer que Marie a cru sa cousine, car elle a élevé son fils pour qu'il devienne un dieu.

Ensuite, il y a Marie Madeleine, qui a découvert la résurrection de Jésus lorsqu'elle est allée oindre son corps après la mort. Les Évangiles notent que Marie Madeleine était l'une des trois femmes qui ont soutenu Jésus avec leurs propres ressources financières. Marie Madeleine a compris que cinq pains et deux poissons ne peuvent nourrir que métaphoriquement cinq mille personnes.

Peut-être
