As roles of CBET, or Council for Bradyrhizobium, Azorhizobium and Other Rhizobia Technology, are crucial in the field of nitrogen fixation and bacterial symbiosis. CBET is an organization that focuses on the study and development of technologies related to these soil bacteria, which have the ability to convert atmospheric nitrogen into ammonia, a form that plants can use for growth. One of the main roles of CBET is to promote research and development in the field of nitrogen fixation. This includes funding research projects, organizing conferences and workshops, and facilitating collaboration between researchers from different institutions and countries. CBET also works to disseminate the latest findings and advances in nitrogen fixation research to the broader scientific community and the public.

Another important role of CBET is to support the development of new technologies based on nitrogen fixation and bacterial symbiosis. This includes the creation of new strains of bacteria that are more effective at fixing nitrogen, as well as the development of new methods for delivering these bacteria to plants. CBET also works to promote the adoption of these technologies by farmers and other end-users, with the goal of increasing agricultural productivity and sustainability.

In summary, CBET plays a critical role in advancing our understanding of nitrogen fixation and bacterial symbiosis, and in applying this knowledge to address some of the world's most pressing challenges in agriculture and environmental conservation.

How to use Hold'em Manager to Maximize your Profits

Last week, we wrote about the

advantages of tracking software and HUDs, and I recommended Hold'em Manager as the software of choice.

This week, we go further in depth regarding how to use Hold'em

Manager to improve your play and maximize your profits.

The Reports Tab

The "Reports" Tab is your home for reviewing your own play.

From here, you can generate a results graph and a variety of reports for your play.

In

your reports tab, you will want several key pieces of information about your results:

Winnings, Winrate, Rake, and Rake in bb/100.

For gameplay stats, you'll want VPIP, PFR,

3Bet, Fold to 3bet, Aggression Factor, Open Raise %, Cbet % and Fold to Cbet % at the minimum.

WWSF (won when saw flop) and WTSD (went to showdown) percentages can be useful as well. Do some research on your own to find the normal ranges for these values so you can understand what's high, what's low and what's optimal.

In the image below, you'll see the tab is sorted by stake. This allows you to track your results and gameplay at each individual limit.

Also note the filters (Date Range, Game Type) at the upper right position of the window. Explore these.

There are a massive number of filters you can use to study your play under even the most specific conditions.

For example, you can

study how you play suited connectors OOP after flatting a preflop raise and check-raising the flop against two opponents.

Another very useful strategy is to sort by position, so you can study your winnings at each position to identify areas of strength and weakness.

You'll also

notice the "HUD Settings" box. We could write an entire series on optimal HUD configuration.

For now, you want it to display Player Name, Hands Played, VPIP, PFR, 3bet, Fold to 3bet, Aggression Factor, Cbet and Fold to Cbet. That's it.

Get

comfortable with just those stats for now, and keep in mind that you should never make judgments based on stats like Cbet and 3bet until you have several hundred hands against a player.

Hold'em Manager also

generates excellent graphs that allow you to share your results with others or visualize your progress. These graphs can be customized to show specific information based on your filters.

The Opponents Tab

The real fun

is learning how to use Hold'em Manager to exploit your opponents. The "Opponent's" tab lets you study your opponents to find leaks.

The Summaries Portion of the Opponents

Tab

This is what the Opponents Tab looks like when set to "Summaries". You receive a detailed summary of the people you've played against. Use this to quickly scan for players with irregular stats.

The graph in the bottom left allows you to see how that player compares to all of the players in your database. From here, you can get an idea if people are playing too aggressive, or too tight.

The "Player Analysis" section puts

a focused lens on any opponent. You can sort with a variety of filters to find a massive variety of information on any opponent. You can find your opponents' hands in specific situations to study their gameplan in detail.

Conclusion

Hold'em Manager is a tremendously useful tool that every grinder should be using in their play.

In this article, we have outlined broad ideas

behind how you should be using Hold'em Manager to keep track of your own play, configure your HUD and find your opponents' leaks.
