Play WMS Gaming Slots for Free - No Download - No Pop-up Spam

WMS are one of

the biggest real money slot machine developers in the World. Vegas Casinos are full of the games made by WMS, including classics like Monopoly, Wizard of Oz, Zeus, Bier Haus, Spartacus, and Goldfish

Williams Gaming, or just WMS, is a subsidiary of the larger WMS industries company. It was founded in 1991, and began making video lottery terminals and slot machines. In just a few short years, the developer managed to create several successful slots. The company has built a strong name for themselves. Enough to attract Scientific Games, who bought WMS and its parent company in 2013 for R\$1.5 billion.

The

software provider may have started with video lotteries, but they are a slot-only developer in the online space. Not that it has hampered the company in the slightest! There is clearly a talented team working at WMS, as they have created some memorable games. Join us as we highlight some of their best releases!

Here, you can enjoy all of

the best free online slots made by WMS - the games are identical to the real money games you would play in Las Vegas casinos, but you don't have to spend a single cent to get the thrill.

Best WMS Games

It speaks volumes that Raging Rhino launched in 2024, and can still be found in the top 100 slots lists. This is the slot, which in our eyes, helped the 4096 ways to win system really take off. Its medium-high volatility with a six-reel playing field make it fun to play. The fact you can win up to fifty free spins will also attract many players. Especially with Wild multipliers appearing during the special feature!

Spartacus Megaways tells the tale of a powerful gladiator who fought to free the slaves from their Roman masters. The game also uses the Megaways system, which by itself is often enough to create some juicy prizes. This release has cascading reels, curtains that block symbols, free spins and expanding Wilds. This is a fantastic combination of bonuses. Something you will find out as you spend hours playing this title!

Monopoly Electric Wins is a game that tries to blend slots and the Monopoly board game in one package. We had our doubts, but we were pleasantly surprised to see that WMS pulled it off so well! This is a delightfully feature-heavy bonus that would take us a long time to explain fully. Keeping it brief: this is a low-medium variance release with an RTP of 96.39%. The maximum prize you can win is 1000x your total stake.

Few slot themes work as well as ancient South American civilisations. Montezuma leads us deep into the jungle in hopes of uncovering an awesome treasure hidden within. How many free spins you get to play is determined by the spin of a lucky wheel? You can get anywhere from three to twenty-five free spins! At the start of each spin, a wheel spins above the reels to reveal a multiplier from 2x to 10x.

Zeus God of Thunder is one

of the few WMS releases that require you to place an Extra Bet. Technically, you can skip it, but it does decrease your odds of winning big. Depending on how many sky icons trigger the Wheel, you get to play a different one. With Extra Bet active, you get more Wilds and free spins from the wheel. The wheel also gives you an opportunity to win the fixed jackpots in the upper right corner.

What are some popular branded WMS slots? We

suggest checking out Wizard of Oz: Road to Emerald City, Nemo's Voyage and Monopoly: Big Money Reel. What are WMS' core values? The company's core values are Innovation, Passion, Integrity, Quality and Respect. What WMS slot has the highest RTP? Snow Leopard is WMS' highest RTP slot, sitting at 97.75%. Can you play WMS games without paying real money? Almost all WMS releases have a demo mode, allowing you to try a slot before spending money on it.

Free WMS Slot Machines

Free WMS Slots - Instant Play WMS Slots

Top games made by WMS to play for free, including Jackpot Party, Goldfish, Alice in Wonderland, Wizard of Oz, Kronos, Zeus and Bier Haus.

As you can see, we have a fantastic selection of free slots made by WMS. The games are all 'instant play', so there is no need to download or registration required.

Innovative, Groundbreaking Games

Games made by WMS have often been at the very forefront of technology and innovation. Examples include the incredible stride forward in graphics, gameplay and sound when they released their G+ and G++ series of slots (including games like Kronos and Zeus)

Similarly, WMS were the first to develop elongated reel slots, when they released their 'Colossal Reels' games. For a while, those games were the most popular (and highest earning for the casinos) in both Las Vegas and Atlantic City.

WMS were

also amongst the first slot makers to include a luxurious seat on some of their games, with Bose speakers embedded in it, that give a 3 dimensional effect when you hit certain bonuses. For example, Lord of the Rings, when it was first released, took these technologies to a totally new level.

Combined with vibrations from the chair, these

features gives an incredible experience that you would not get with an online slot machine. Technologies like this are what separates real money slots in places like Vegas apart from the games online.

On good example would be when Glinda the Good Witch

comes along with her magic wand in Wizard of Oz slots. first you feel a slight rumble, then the reels go slightly blurry like something very weird is happening (the first

time you experience this it is very strange), then you hear her coming along as she appears from right to left the sound travels around your ears in 3D. It is, simply stunning and makes you want to experience it many times. Very clever.

Classic Vegas

Games by WMS

Although we don't have free versions of all of the WMS games we have here, we are getting more and more each week, so it is always worth checking in to see what you can find. For example, If you haven't played the colossal reels games by WMS, then take a look at Spartacus or KISS.

You might also want to see the Goldfish game. This

one is free to play and is just the same as the one in Las Vegas, it is great fun and one of our most popular games here at penny-slot-machines

Williams Gaming's History

WMS

gaming originated in the 1940's as a pinball manufacturer. The company was founded by Harry Williams who used his engineering background to develop the first "tilt" unit for pinball machines.

The games produced by Williams Manufacturing Company later became produced by the well known Midway games that had many hits in video arcades both with pinball titles and alter with video games as well and they continue to provide titles to video arcades today. Williams Gaming split from Midway and has since changed their name to WMS Gaming to keep up with the times and improve their brand image.

As Williams

Gaming, they have come a long way since the 1940's pinball machines by providing different types of casino gaming devices. The first gambling machines they produced were video lottery terminals in the late 1980's. In the early nineties, Williams Gaming started to manufacture video poker machines, then later in the decade, they entered the slot machine market place.

Their first hit was in 1996, with a video slot machine

called "Reel 'em In". This machine was a very innovative product, shunning the traditional mechanic machine, with limited themes, and starting fresh with new symbols and game play that included the first multi-line game as well as multiple coin games with secondary bonuses.

One of the things that set WMS gaming apart from other casino

gaming manufacturers is their titles. They were one of the first companies to license brand names that everyone knows and as such has had some serious successes with games in the Monopoly series as well as The Wizard of Oz, Top Gun, Star Trek and more.

By

securing licenses, they can put out games that are legally able to use the names, likenesses and in many cases voices of the characters from the Television shows or movies bearing the same name.

WMS also works hard to keep all generations of casino

gamers happy. They still produce older models that have less features simply because this is the type of game which older casino gamers prefer to play.

Players who love

video games, on the other hand, crave the latest and greatest games and more challenging games that have some skill based elements to them. For this generation, WMS has games including an entire line of games in their Sensory immersion gaming line.

Included in this gaming platform are two versions of the Wizard of Oz title as well as a Top Gun game and a Dirty Harry game.

Each game is completely unique, but with top

quality graphics provided by serious computing and graphics computing power that rivals top gaming PC's as well as surround sound systems built into each console and equipped

with top notch speakers from the well respected manufacturer Bose.

On top of sound,

game play is also built into the seat, making the Top Gun slot machine game better than most flight simulator games in arcades.

WMS sets itself apart by offering strong

products and strong titles that fit the game experience that many different people are looking for.

Can I Play WMS Slots at USA Online Casinos?

No, if you live in the US you

can't yet play slots made by WMS online for cash.

WMS, who make games like Wizard of

Oz, Spartacus, Zeus, Bier Haus, Amazon Queen and Invaders from the Planet Moolah do not yet allow their games to be played at online casinos in the US.

Turista comparte {img}s que muestran el derretimiento acelerado de los glaciares en los Alpes suizos

Un turista ha publicado "impresionantes" {img}s 3 de sí mismo y su esposa en el mismo lugar de los Alpes suizos casi exactamente 15 años después, en 3 un par de {img}s que destacan la velocidad con la que el calentamiento global está derritiendo los glaciares.

Duncan Porter, un 3 desarrollador de software de Bristol, publicó {img}s tomadas en el mismo lugar en el glaciar Ródano en agosto de 2009 3 y agosto de 2024. El hielo blanco que llenaba el fondo se ha reducido considerablemente para revelar roca gris. Un 3 pequeño estanque en la parte inferior, fuera de la vista en el original, se ha convertido en un gran lago 3 verde.

"No les voy a mentir, me hizo llorar", dijo Porter en una publicación viral en la plataforma de redes sociales 3 X el domingo por la noche.

Porter y su esposa habían tomado la {img} original desde un mirador junto a un 3 "hotel de estilo Wes Anderson" que desde entonces ha cerrado, y la han colgado en su cocina. ansiosos por regresar 3 a las montañas y dejar que sus hijas adolescentes Maisie y Emily vean el glaciar, emprendieron un viaje en autocaravana 3 por Europa y se propusieron recrear la {img}.

"Pero obviamente las circunstancias de esta {img} eran drásticamente diferentes", dijo Porter. Helen 3 Porter, enfermera, añadió: "Pensé que era realmente increíble".

La contaminación de carbono liberada por la quema de combustibles fósiles y la destrucción de la naturaleza ha calentado el planeta 1,3C desde tiempos preindustriales. En Europa, que se ha calentado el doble de rápido que el promedio global, los veranos más cálidos han obligado a la gente de las regiones montañosas a ver cómo se derriten lentamente los glaciares ante sus ojos.

Suiza ha perdido un tercio de su volumen de glaciares desde el año 2000, según estadísticas oficiales, y el 10% ha desaparecido en los últimos dos años.

"Mucha gente, cuando ve algo así, se siente bastante impotente", dijo Porter, que forma parte del comité de un grupo de acción climática local en el suroeste de Inglaterra. "Pero, en mi experiencia, hay una gran cantidad de cosas que pueden hacer".

Dijo que no quería "sonar pedante" pero señaló los proyectos comunitarios locales como una de las "maravillosas" formas en que las personas ordinarias pueden participar en la acción climática, junto con exigir cambios sistémicos a través de la forma en que votan y compran.

El Grupo Intergubernamental de Expertos sobre el Cambio Climático (IPCC) encontró que, en su peor escenario para el calentamiento global, "casi todo el hielo de los glaciares" desaparecería en los siglos venideros en latitudes bajas, Europa central, el Cáucaso, Canadá occidental y EE.UU., Asia del norte, Escandinavia y Nueva Zelanda.

El glaciar Ródano se ha desplomado aproximadamente una cuarta parte en la década y media entre las imágenes de Porter.

"Era un glaciar muy impresionante", dijo Sonia Seneviratne, científica climática suiza y coautora de un informe del IPCC, que visitó el glaciar de adolescente. "Es muy triste ver esas imágenes porque ves lo grande que han sido los cambios".

Los usuarios de X reaccionaron con horror y dolor al post de Porter, que ha sido visto millones de veces, coincidiendo con la angustia de la pareja. Pero el post también atrajo un flujo constante de comentarios de cuentas que niegan el cambio climático suscritas al servicio premium de X, muchos de los cuales eran abusivos y distorsionaban la ciencia climática establecida.

Porter dijo que era consciente de que los glaciares se retiran y avanzan a largo plazo, pero que muchos de los comentarios en su feed eran inexactos y se basaban en fuentes dudosas.

"Estas cosas deberían suceder en períodos de tiempo realmente largos", dijo. "Lo que la gente debería centrarse es en la velocidad del cambio".
