About This Game

The game consists of 4 parts:basic skills:1: For the stand-alone game, you can play tournament games and heads-up games against professional-level AI opponents.The current price isR$50. In the next version, the nash solver real-time calculation and decision-making function will be integrated in the decision assistant of the game. The price will be raised toR$100, just to let you experience the value of GTO technology in real-time games.Advanced Features:2: A complete set of Texas Hold'em calculation tools.3: Simulator function: It can be used as an online Texas Hold'em game auxiliary tool for real-time calculation of various data and decision-making assistant tools, as well as a post-match review tool, or use the simulator as a hand training device.4: Hand trainer: In the game, you can freely set your hole cards or a custom range, or set a certain type of player range, so as to train.These tool functions will be removed in one version and placed in another Poker Solver product. The entire new Solver tool product will be priced atR$100/year, and the assistant inside will beR$99/month,R$799/year. The simulator, which integrates the computing power of the new version of Poker Solver, has been making steady money in real money games. The whole set of tools is better for live games than https://rangeconverter/ . The Poker Assistant assistant version costsR$5,000.The core functions of the new version of Poker Solver:1: Solver tool set, with Pio Solver's Nash solver computing ability to solve the Headsup two-person game, and also has the core computing ability of 2~9-person table Icmizer3 multi-player Nash Solver, and cooperates with the poker simulator to complete the real-time Ability to calculate and review.2: Poker complete set of mathematical calculation tools (Poker Tools).3: Simulator and Assistant (Assistant), to meet the real-time calculation of the game and decision-making ability, as well as the resumption calculation ability.4: The existing game function will become a customized practice function (Quiz), and 500 WSOP best hands are customized, and you can only play these specific hands.The version you buy now does not integrate these Solver product functions. This version only meets the AI battle function and specific card and range training functions of the same professional player level.At the same time, other Poker Solver tools do not have the game battle function in the Single player stand-alone game.Different products solve different problems. However, the AI in the Single Player stand-alone game will integrate the Nash Solver computing power when the upgraded version is released, allowing you to experience the effects and functions of the Solver. Although the current version does not have Nash computing, it can basically guarantee 70% of the decisions are correct. up.The new version of Poker Solver will be released in March 2024, and this Single player stand-alone game will be updated at the same time.This means that until March 2024, buyers can still experience the advanced features in Single player stand-alone games.The removal of these advanced features does not mean that the product is devalued. In the new version of the game, there are 4 advanced strategies for you to configure freely. In the game interface, you can still see the data analysis capabilities displayed by various upgraded advanced tools. The data displayed by these real-time calculations is valuable knowledge.The 4 strategies

include:1: Pio Preflop Chart2: Push/Fold3: Nash Equilibrium Solver4:10Groups RangeThe table below shows the functional price comparison between the computing tools in the game and other Texas-related computing products on the market.In this game, you can freely organize the table, freely set the blind level, freely set the hand range of each opponent, freely set the opponent's AI type, and freely set your own hand range, so that every time you deal You're dealt cards in this range, and you're free to set one of the 20 good cards for a definite workout.In the game, the complete real-time calculation of each player's various winning rate data on each street, listening to the winning rate, and EV data saves you from the trouble of manual calculation, and will also give you AI decision-making suggestions from professional textbooks. These ensure you can complete on-demand training. and judging whether it makes sense to you.The complete display of these information in the game is also to help you analyze the game, so that you can know the logic of your own winning and losing, where you win and where you lose.There will no longer be any free version on the mobile phone, nor will there be any advertisements, and there will be no advertisements on all versions of the entire platform.New products and new features will be continuously released and updated.In the past two years, I have been researching and practicing the ability of Poker Solver, and will complete the release of new products next year. Extremely powerful solver ability.Regarding the price of the game, it will only become more and more expensive, because I am making more and more money in the game, so why should something of value be cheap. This is the long-term value compounding of self-development.Be careful and make valuable products, which is the original intention and purpose.manualcore function:1: Click the function board card to set the community card, and click the hole card icon to set the hole card.2: Different player types can be set, and each player has a different range of actions. These ranges also determine different action logics.3: Equity calculator, draw equity calculator, EV calculator, real-time poker simulator tool.4: Real-time poker simulator tool, this is the most important for online professional players, which greatly simplifies the time consumption of thinking and performing calculations.5: Advisor (advisor) provides you with a standard play, the basic guarantee is not to lose money.6: Before the action decision, provide the EV value of different actions and betsize.7: Practice the advisor and action EV in the battle mode.Core value points:1: Poker simulator tool: When playing poker online, professional players can display the complete mathematical data immediately after entering the opponent's range in real time according to the situation of the game table, saving users calculation time and energy, and providing standardized behavior suggestions. These real-time and accurate calculation data and standardized action suggestions help players make quick decisions.Value point: It saves the player's energy consumption in mathematical calculations in the game, and allows the player to invest more energy to focus on the accurate determination of the player's playing range and the use of real-time data to make decisions based on experience.Real-time display of all poker game data, which is not available in other tools. I combined the various data calculation functions scattered in multiple Texas poker calculation software into the real game. The player only needs to determine the opponent's range.In the simulator, Preflop and postflop are also purchased professional range action data, which can be set in the simulator: stacks deep, bet size, and player position to see the real-time advisor. Now this advisor is conservative.range data comes from rangeconverter/solution_formats/eight_max-MTT-Complete-Postflop-Addon-NEWOnlineViewer-yearly The core of the simulator is that you need to have the ability to judge the opponent's range of action. This is also one of the most basic and most important abilities of playing cards.If you don't have the ability to display the range of Texas Hold'em at all, then you can use this tool to repeatedly play poker to familiarize yourself with the range. In the battle mode I provide the ability to display the range in real time. Let you clearly see how different people in different ranges play, and those actions are standard textbook play styles for professional players.Real-time display of complete data: The data standard provided comes from the result of 10,000 times Equity calculated by Monte Carlo method. In the battle mode with AI, you need to turn on the observer mode switch (observer)Data in the avatar frame:1): EV: 0.70BB, indicating the EV data after the current operation. BB stands for the big blind value.2): equity data for each street:2r: 4; 12.93%. Format: 2r (to river equity, calculated to river street Equity): rank (in the current surviving players,

own 2r Equity ranked); equity (own real-time 2r Equity, 2r Equity calculated from your own perspective). Indicates that the Equity data to River Street is calculated based on the player's own hole cards against other players' range or hole cards.nd: 1; 72.67%. Format: nd (next street equity, your own Equity on the next street): rank (ranked your own nd Equity among the current surviving players); equity (your own real-time nd Equity, nd Equity calculated from your own perspective). Indicates that the nd Equity data to the next street is calculated according to the player's own hole cards against other players' range or hole cards.cp: 1; 88.23%. cp (current street pure equity, the pure Equity of one's current street): rank (ranked of one's own cp Equity among the current surviving players); equity (your own real-time cp Equity, cp Equity calculated from your own perspective). Represents the calculated cp Equity data on the current street based on the player's own hole cards against other players' range or hole cards.Outs: 30, which indicates the number of draws made by players on that street. At this time, you can open the hands card strength information table, and you can see the probability of the current hole cards and board cards developing to various draws on each street.1: In preflop and river street, showing 2r is enough.2: On flop, turn street: displays the complete 2r, nd, cp data, and on flop, turn street, you can see the outs data of the player in that street at the same time.These real-time Equitys and draw data assist in determining the hole cards against other players' hole cards or ranges, their own hands card strength and winning ability, and help them make action decisions on various streets.The betsize window at the top of the interface shows the human player (self) under the current action menu, the EV value ranking of each action in the action menu, the leftmost is the best, and it decreases from left to right (if there is only the leftmost data, then it is According to EV evaluation, this action is the most appropriate, and other actions do not need to be considered). This is based on the action logic shown by the EV. This is also the EV data of each action calculated by the player himself before the action. (The EV data in the avatar range is the EV data after the action, and the meaning of the two is different).This 4-speed EV table of betsize is the data display for making decisions based on EV when displaying the street.In fact, EV has no absolute correct meaning in action guidance before and after the flop (preflop and postflop), and it is not correct to make decisions based on the positive and negative EV.Advisor (Advisor): Shows the decision in this street, comprehensively assessing the following content: player's hole cards, opponents' range or hole cards, current own 2r, nd, cp Equity data and Equity ranked, and the player's own position Table position, player's current stacks deep, current number of people remaining at the table, EV data of each action in the current menu, and bankroll management. The current advisors tend to be conservative, and the goal is to try not to lose money.Advisor also implements a standardized pre-flop strategy in preflop.Advisor also implemented the post-flop strategy suggested by rangeconverter in postflop.In the battle against AI mode, you need to turn on the advisor mode switch (observer).Click on the user's avatar to open the user's scope, view or set the scope.Click on the hole cards, you can open to view or set the hole cards.Click on the board card, you can open to view or set the board card.In the simulator, click the D icon to switch the position of the dealer.Click the gray D icon to reset the position of the dealer.Regarding range setting or selection:1: Provides the standard range for various filling actions in the preflop stage.2: Provide 24 kinds of action ranges commonly used by professional players. Each professional player divides all hole card combinations into 10 action groups. You can see the action ranges of tag, lag, rock, maniac, and nit players.3: Provides a view of the opponent's mathematical action range based on the opponent's vpip and pfr. Vpip and pfr can view these two values of opponents from third-party statistical software licensed online, such as holdem manager 2.The graphical Equity calculator provides a complete and correct Equity calculation function.I provide complete toflop, toturn, toriver's montecarlo and Enum calculation methods. It has the same effect as Power-Equilab, and its own data is guaranteed to be correct.When Power-Equilab calculates toflop and toturn, the data is often incorrect (why it is not, you will know by playing with his montecarlo and Enum methods, the longer the calculation, the greater the deviation of the two data, which is wrong), But the calculation result of to river is correct. It sells forR$40/year. It does not have a real-time calculation method in the game. It is not suitable for actual combat, but only for review calculations, lacking actual combat significance.The provided Equity calculator, draw

calculator, and EV calculator are all to ensure that you know the correctness of the data calculation results and allow you to trust the correctness and stability of the function.The AI in the battle mode comes from the range of 24 professional players. You can conduct targeted range confrontation strategy training.1): Various AIs and advisors use the same standard professional gameplay action logic. The difference from yours is only the hole cards and the action range.2): 14 types of chip depths (10BB~100BB, 200BB) are provided (different medals will open different new chip depths, and different chip depths will have different playing methods). Because of the different chip depths, the card game will be played The strategy is completely different.3): AI adopts the textbook style of professional players. You can understand the AI's action logic in thousands of matches, you can learn this action logic, and you can also find the corresponding exploiting AI logic. Repeated training can help you quickly identify the opponent's ability and the opponent's range.If it is in Steam, there is no sound.0: under \Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows_Release, rename Windows_Release to Windows_Release11: Adjust your computer sound controller.2: You can download the game from D:\Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows_ReleaseMove another folder, and then click TexasHoldEmSingle.exe to have sound.

Em 6 de junho, as tropas aliadas participaram da Operação Overlord um ataque combinado naval e aéreo nas praias do Normandia que levou à libertação dos europeus.

Antes do 80o aniversário da data D, cinco pessoas compartilham as experiências de seus parentes sobre a maior invasão marítima na história.

"Ele tinha apenas 18 anos na época"...

Jim Walker.

Meu tio James (Jim) M Walker era membro da tripulação do BR LST-538, que pousou na praia de Omaha no dia D. Nascido foguete pix bet 1926 ele tinha apenas 18 anos naquela época e escreveu uma carta notável aos meus pais descrevendo tentar reparar um navio quebrado desembarque sobre a Praia esquivando-se das balas conchas; o mais impressionante é ser torpedeado por S -boat alemão para voltar à Londres onde foi colocado nas águas secas dos cães Isle Dog'".

Enquanto seu navio estava sendo rebocado através do Canal, e porque eles tinham sido torpedeados antes. os homens estavam assustados no convés de guerra não foguete pix bet seus belichees Quando viram foguetes V-1 nos céus nunca tinha visto nada parecido com isso mas assumiu que era uma das armas vingança Hitler 'S Eles temiam ter perdido a Guerra por causa dos efeitos da mísseis teria Walker morreu na 2010, aos 84 anos (em Olive Branch), Mississippi).

Meu pai, Rex Richard Joseph Wintle (Cheltenham), nascido foguete pix bet 8 de setembro 1924 no Cheltnham foi um veterano do Dia D que dirigia suprimentos para todos os tipos.

Ele fazia parte da força de invasão inicial que pousou na praia do ouro logo após o dia D. Eles esperaram no Canal por causa das condições meteorológicas terríveis e muitos deles estavam muito enjoados pelo mar, perderam a noção sobre qual era seu momento atual; Muitos não sabiam nadar então chegar à Praia foi perigoso demais para se aproximarem dele!

Ele finalmente faleceu foguete pix bet 13 de agosto 2024 a partir dos ferimentos na guerra (um pedaço do estilhaço moveu-se e perfurou seu cólon; devido à foguete pix bet idade avançada, quase 90 anos ele não conseguiu lutar contra o infecção). Esta é apenas uma pequena descrição da verdadeira bravura das tropas comuns que nos deu nossa liberdade.

"Ele foi responsável por consertar o navio"...

Uma citação que menciona o trabalho Charles William Lenard Brown realizado no HMS Largs.

{img}: Martin Brown/Guardian Community

Meu pai, Charles William Lenard Brown nasceu foguete pix bet 1921 e foi cabo no REME (Engenheiros Elétrico-Mecânico Real) que postou para o navio de comando HMS Largs. O QG da Sword Beach é um carrossel com uma colega responsável por consertar a nave antes do dia D -o qual desempenhou papel importante na aterrissagem bem sucedida

O navio tinha pessoas dos três serviços trabalhando na comunicação com a sede no Reino Unido, os comandos de serviço e o local do desembarque à beira-mar. Havia um grande problema nisso; meu pai ou colega resolveram esse problemas ".

Acima está a citação original datilografada atestando esta importante correção de comunicação. Ele serviu foguete pix bet Largs para todos os seus desembarques na Europa e no Extremo Oriente, tendo cinco medalhas estrela batalha por suas ações corajosamente feitas : ele morreu aos 66 anos sem nunca me falar sobre isso - descobri através duma caixa das cartas dele guerra {img}grafias...

"Um escudo naval explodiu a torre"

William Nowlan com foguete pix bet esposa, May.

{img}: Anthony Nowlan/Comunidade da Guarda.

Meu pai, William Clifford (Cliff) Nowlan que teria 100 anos este ano era membro da tripulação de um tanque para pouso foguete pix bet embarcações e levar a infantaria canadense à praia Juno com uma primeira onda. Ele nasceu no 1924

e viveu toda a foguete pix bet vida foguete pix bet Preston, Lancashire. começando como o menino de farinha na cooperativa (co-op) até se alistar no mar durante as guerras;

Depois de desembarcar a infantaria, o LCT recuou e bateu uma defesa subaquática que se escondesse nela. Meu pai nunca aprendeu nadando foi puxado da água por outro navio também escondido na praia para ser atingido pelo fogo disparado pela torre foguete pix bet Courulles-sur - Mer França; depois um escudo naval destruiu toda esta estrutura do local onde estava localizada foguete pix bet casa no mar até então distante...

A única coisa boa, ele disse que a unica vantagem era ter perdido o LCT não terem sido enviados para fora do exterior se prepararem pra uma invasão no Japão. Ele nunca mais foi ao estrangeiro até seu 50o casamento e aniversário de Dia D quando lhes damos um feriado foguete pix bet Jersey onde viajaram durante esse dia à praia JunO - morreu aos 80 anos na época (2004). Como jovem eu costumava usar suas velhas botas marinhas desde os dias-D também nos subúrbios) Nunca gostei disso naquele momento!

Anthony Nowlan, 68 anos de idade e médico aposentado.

"Eles não tinham se visto foguete pix bet toda a guerra e acabaram na mesma trincheira."

O meu sogro, Robert Cameron Brunton Murray era um dos 13 irmãos. Em 1944 dois de seus irmão estavam na marinha e ambos serviram no Dia D entregando tropas para uma das praias William (Bill) Leonardo Quilietti Murdoch nasceu foguete pix bet 11 junho 1921 ; E Leonard(Leo), o filho do marido nascido a 16 dezembro 1924 - ambas as cidades Edimburgo-

O ofício de Leo entrou foguete pix bet dificuldades e teve que ser rebocado – pelo Bill. Eles não tinham visto um ao outro toda a guerra, acabaram na mesma trincheira onde o bill deu para seu irmão uma meia à medida como as botas do leo estavam encharcadas; isso iniciou-se com piadas antigas: cada vez eles se encontravam pedindo suas meias novamente...
