Muitos utentes envolvidos gastam somas-chave de dinheiro nestas apostas, encontram-se diante de custos financeiros imprevisíveis ou sequer ameaçam os planos financeiros das suas próprias fam

PokerTracker4 is by far the best and most advantageous HUD poker software for players. If the goal is to make money playing poker, PokerTracker is not a necessary, but almost a necessary purchase. This software, made up of several different poker support tools, supports no-limit, pot-limit and limit poker. You can use PokerTracker 4 in Sit n' Go, Cash, MTT, Satellite, Spin & Go tournaments and, of course, in cash games like Texas hold'em and Omaha poker. The app works with Windows and Mac devices. All the marks and reviews say it's probably the best online poker toolbox in one place.

Special offer!

Buy the PokerTracker 4 software via our link and get 1 month free membership!

We

recommend that instead of reading good reviews, you try the app yourself now. You can do this completely free of charge. The developers of PokerTracker give you a 30-day free usage period. During this time, you will be able to try the software for free in Hold'em or Omaha games and get a closer look at how it works. If after the trial period you decide that you don't like the software, you can simply not buy it. However, we can safely say that you will be hard pressed to find a better HUD alternative on the market than PokerTracker4.

PokerTracker 4 - Why try it?

If you want to make money playing poker, you will have to accept that if you don't use the software, your opponents will. A monthly subscription or a one-off fee is definitely worthwhile, especially if you are an active player. Since it is almost impossible to predict all possible scenarios and outcomes in your head, and to read the actions of all the players at the table at the same time, it's worth using a software program such as PokerTracker 4 to help you. Because you can try it for free.

What is PokerTracker 4? (PT4)

PokerTracker is a computer program. It requires Download, download (install), run and then use it immediately. PokerTracker 4 is a HUD and tracker in one.

HUD - what is it?

HUD is an

acronym for Heads-Up Display. We do not have an exact translation equivalent in the Lithuanian language, so we often hear names such as "Hood", "Heads-Up Display", or we write the untranslated name at all. In fact, HUD describes the video projection technology that creates the image in front of our eyes. In simpler terms, it adds something to a normal image on some surface.

The best example of HUDs is HUD

projections in new cars. A special projector projects important data onto the windscreen of the car (e.g. the speed, the track you are driving on, etc.). They are not there, but they are projected there. So, in fact, a HUD can also be called a projection. In the case of PokerTracker 4, the HUD projects an image "on top" of what

the poker software itself is displaying. More precisely, it adds to the visible image.

In poker, the HUD acts as a tool that helps you easily see a large amount of data about the game, all at once. It fills the regular application screen with a wide range of relevant information (e.g. win probabilities, player action history, etc.).

The HUD allows you to see your odds in clear percentages and simplifies decision making. The data changes in real time, so you'll always have as much information as possible at the time you need to make your move.

Tracker - what is it?

PokerTracker is

not just a HUD or visual aid. It also has great analytical potential. Analytical tools that track and analyse the progress of the game are called trackers. With PokerTracker4 it is very easy to keep track of your past game statistics, to see various indicators such as Flop Float %, Preflop Limp %, Pre Flop Raise % and others. By looking at this data and analysing it, you can not only see how much you've won, but you can also find out what you could do differently to win more, what mistakes you're making, where in the game you're getting pressured and so on. New and experienced players alike will notice and appreciate how many features the app has. There are some disappointments with some of the other HUD-type applications. Other HUDs or tracker-type applications offer only very superficial real-time assistance. PokerTracker 4 puts so many analytical tools on a plate, collects so much data and works so well that you really don't need to buy any add-ons or plug-ins to improve your results.

Where can I play

PokerTracker 4?

Perhaps the most interesting thing that puzzles every player before choosing a poker software is where will it be available to play? As you probably all know, an app needs to support a poker room and be compatible in order to take advantage of the features it offers.

PokerTracker shines brightly here again, as both Windows and Mac users can play it pretty much anywhere. It's true that the latter will enjoy a slightly narrower list of rooms, but the result is still very good.

PokerTracker 4

poker rooms for Windows PCs available 888Poker, PokerStars, Winamax, MPN and many more.

Full list:

Mac owners can connect to 888Poker, PokerStars, Winamax, Merge, Full Tilt and several others. Full list:

We advise you to check that the software supports your favourite poker room before you buy or invest in it. Otherwise, it's worth upgrading to one of the supported rooms, at least for a trial period. Believe me, the benefits will be noticeable, so it pays to play wherever you find it easier. Don't forget that you can register in some rooms at an exclusive PokerSchool discount. Don't miss out on this opportunity!

How to get started?

This section will give you a brief overview of how to download, sign up and start using the application. However, there is also a video guide to help beginners. You will need a little patience at the beginning. Although it will only take you up to 10 minutes, certain steps require attention and patience. We've put it all in one place for your convenience.

How do I download and install the

PokerTracker 4 HUD?

Click on the link. Download the application and run the downloaded file. The installation will start. Accept the terms and conditions, select the location on your disk where you want the programme to be saved. Wait for the installation to

finish. It usually takes a few seconds. Start the app. Enter your registration code (if you have one) in the window that pops up, or choose a 30-day free trial with Texas Hold'em or Omaha poker games. In the next window, the program will ask you to subscribe to a PostgreSQL database. Please accept this, as this database/application is free and allows you to store your hand history. The recording will be done automatically. Accept the PostgreSQL server settings (do not change anything) and complete the installation (takes about a minute). Now you will need to create your own database using PostgreSQL. You can have more than one of these databases, but one will be enough to start with. Give it a unique name (if you wish). Do not change any other settings. Create the database and accept the offer to have PokerTracker HUD link the data to PostgreSQL. In about half a minute everything should be connected. Proceed to the final configuration (select the currency you are playing in, then select the rooms you will be playing in, and check that the hand history settings in the poker room software match the PokerTracker 4 settings.

Finally, harmonise the layout and number of Seating. The configuration of the individual poker rooms follows, but do it according to your needs. Basically, the programmers have prepared clear guides for each room, which are easy to follow and to calibrate all settings. Finally, select the desired HUD view (how the data appears on the screen). Next, in the app, click on Play Poker and Get Hands While Playing in the top left.

That's it, let's play!

P.S. Please note that the HUD will only activate when you have played one hand. Don't be alarmed.

PokerTracker 4 HUD and  
Tracker Benefits

We can easily find more than one reason to use it. For those who are serious about online poker and for those who want the best possible results, this app can be a step up or a breath of fresh air after an unsuccessful stretch. Once you get to know the tracker's analytical tools properly, you will inevitably improve your results. Well, here are the biggest advantages of this app

Personalisation

It is most

often described as a flexible and very versatile tool for poker players. Its appearance and data presentation can be changed to suit your needs. The HUD is fully customisable, which means that each player can change it as they see fit. Reports and statistics are collected and generated automatically and the software is very user-friendly.

Supports

a large number of poker rooms

Not all HUDs or trackers are compatible with popular poker rooms. Some expensive tools work in isolated or little-known poker rooms. PokerTracker does not have such problems. It is compatible with the world's most popular poker rooms for both Mac and Windows operating systems.

Free to try

The app

itself offers a 14-day free trial period. However, with the Pokeriomokyla link you can try the app for up to 30 days. Other apps do not offer this.

Lots of different tools

No

matter how calculating and methodical a player you are, you probably won't be able to tell what percentage of your hands have made it to the showdown stage or see your Luck Bell curve. PokerTracker 4 will show and reveal all the numbers.

What do users say  
about PokerTracker 4?

We will also share the views of other internauts and active poker  
players about the software.

"PokerTracker 4 stands out as one of the best apps for  
playing poker online. Users have: access to revealing reports, a wealth of configurable  
and changeable settings, and everything to make it compatible with other  
applications.

Online poker is simply too fast for you to be able to accurately analyse  
and calculate everything yourself in real time. But with PokerTracker 4, you can not  
only follow the action and keep an eye on the situation from the outside, but you can  
also get ahead of the game and stay one step ahead of the game. In this game, every  
advantage counts, so take advantage of it as soon as you can."

- Cardschat

"With the

PokerTracker HUD, you can 'read' the situation at key moments. In online poker, it is  
essential to read your opponents' behaviour. This is especially important if you play  
multi-table poker or Zoom poker. There are simply too many players to keep track of  
everything. The PokerTracker 4 HUD allows you to constantly see, and have a wealth of  
statistics in front of you, not somewhere far away, but right on the poker table  
itself. This information will allow you to see and see exactly who you are up  
against.

However, the PokerTracker database is the element that plays the most  
important, game-changing role. This is the feature of the software that is most  
appreciated by poker professionals. It is in the database that we can check our hands  
and filter the information to find gaps and close them. It's also where we can analyse  
our opponents' play to find the best ways to beat them, and understand what strategies  
they are using that might be better than ours at the moment.

Finally, if you're serious

about online poker, it's time to download a tracking/HUD software like PokerTracker4.

PokerTracker 4 features an exceptionally flexible HUD technology that  
adapts to your table sizes with surprising accuracy.

A real-time vector HUD that

automatically, instantly adapts to your table size and changes. It is currently the  
most advanced HUD system on the market and is exclusively available on PokerTracker  
4.

Additional pop-ups that can be assigned to a specific player or statistic.

Choice

between all information about a player and only information about this table, this  
session.

Ability to filter player stats by effective stack in real time.

The ability to

see your own and your opponents' BB or M count in real time, after each hand.

The

ability to view and annotate hands in real time.

Reports, graphs and

filters.

PokerTracker 4 allows you to see your game in the form of detailed graphs and  
charts. It's important to note that all of the built-in analysis features and add-ons  
are included in the basic package and do not come at an additional cost, as is the case  
with competitor software. The entire system of graphs, filters and reports has been

redesigned and developed to make it as easy as possible for the user to understand and use.

View reports, and double-click on a report to go to a more detailed level of that report, allowing you to analyse your game down to the last detail.

Hand analysis

provides a percentage win against the opponent's hand or the opponent's entire range.

LeakTracker helps you solve basic problems simply by using PokerTracker's training videos.

The Luck Bell Curve is a good indicator of whether we are on the lucky streak or lagging behind the variation. It shows how our results differ from the actual EV.

The Money Flow graph shows how money moves between players and where we make the most money.

It's very easy to create and save your own separate reporting systems.

## **Retrasos en las inspecciones de productos animales y vegetales en el Reino Unido: ¿se acerca una nueva demora?**

Michael Gove anunció en marzo de 2024 la primera prórroga de los controles posteriores al Brexit sobre productos animales y vegetales que entran en el Reino Unido desde la UE. Hizo hincapié en que, si bien muchos en la industria de la frontera y muchas empresas habían estado invirtiendo tiempo y energía para estar listas a tiempo, y el gobierno también estaba listo, habían

escuchado a las empresas que habían hecho un fuerte caso de que necesitaban más tiempo para prepararse.

Tres años y cuatro prórrogas después, el martes finalmente verá la introducción de esos controles. ¿O no?

Esta vez hay preguntas sobre la preparación del gobierno. En una presentación interna filtrada vista por el Financial Times, el Ministerio de Medio Ambiente, Alimentación y Asuntos Rurales (Defra) delineó un plan para implementar gradualmente los controles, con inspecciones físicas inicialmente «fijadas en cero» para todos los productos, excepto los de más alto riesgo.

El gobierno respondió, insistiendo en que los controles comenzarían el 30 de abril, pero indicó que se centrarían inicialmente en los productos de más alto riesgo y aumentarían gradualmente los cheques en otros bienes de una manera «razonable y controlada».

Los MP quieren una explicación, escribiendo al Defra la semana pasada, diciendo que esto parece ser «un sexto retraso en la implementación de los cheques de productos animales y vegetales en todos menos en el nombre».

## **Cambios planificados**

El proceso de inspección comenzará con cheques más «basados en el conocimiento», centrándose primero en los productos de más alto riesgo en todas las categorías. Esto verá los cargamentos elegidos para la inspección basados en factores como el país de origen y la empresa que los entrega, y cualquier información adicional sobre ciertos productos que ingresan al límite.

Los niveles de aplicación también se ajustarán en función de la conformidad de las mercancías y los niveles de interrupción.

## **Un escalonamiento desde el plan establecido**

Este es un cambio con respecto al plan establecido, que pretendía verificar entre el 1% y el 30% de las mercancías de riesgo medio, que incluyen carne, queso, huevos y pescado, a partir del 30 de abril, y el 100% de las mercancías de muy alto riesgo, que incluye plantas de plantación y animales vivos.

El gobierno dijo que tenía la intención de construir hasta este nivel de controles, pero aún no ha dado un cronograma.
