Oasis Poker

Introduction

Oasis

Poker is a variation of Caribbean Stud Poker. The rules of Oasis Poker are the same as Caribbean Stud, except the player is allowed to exchange cards before the raise/fold decision, for a price of course. The game can be found mostly in eastern Europe, northern Africa, and Internet casinos using Galewind Software. Following are the complete rules.

Rules

The player makes an ante wager plus optional side bonus side bet.

Player and the dealer get five cards each. All cards are dealt face down, except one dealer card is exposed. The player may examine his own cards but sharing of information is not allowed. The player has the option to switch one card of his choice for the next card in the deck. There is a fee to do this, equal to the ante wager. This fee is non-refundable. The player may switch one or more cards. The price for switching depends on the number of cards switched, as follows: One card: 1x the Ante.

Two cards:

2x the Ante.

Three cards: 3x the Ante.

Four cards: 2x the Ante.

Five cards: 1x the

Ante.

If the player switches all five cards, then he must raise. The player may either fold or raise. If player folds, then he forfeits his cards, ante bet, and side bet (if made). If player raises, then he must make a raise wager exactly equal to twice the ante. The dealer will turn over his other four cards. The dealer must have an ace/king or higher to qualify. In other words, the lowest qualifying hand would be ace,king,4,3,2. If the dealer does not qualify then the player will win even money on his ante wager and the raise will push. If the dealer qualifies and beats the player both ante and raise will lose. If the dealer qualifies and loses to the player then the ante will pay even money and the raise according to the Raise Pay Table below. Other pay tables have been known to exist. If the player and dealer tie then both the ante and raise will push. The bonus bet win will be entirely based on the poker value of the player's original hand.

Standard Raise Pay Table Hand Pays Royal flush 100 to 1

Straight flush 50 to 1 Four of a kind 20 to 1 Full house 7 to 1 Flush 5 to 1 Straight 4 to 1 Three of a kind 3 to 1 Two pair 2 to 1 All other 1 to 1

Strategy

I have never

quantified a perfect card switching strategy. My program makes a perfect decision every time by analyzing all possible combinations of the replacement card and all four dealer cards. However, from running through some test hands I believe the following strategy is close to optimal.

The player should switch one card with any of the following:

Four

to a straight flush and royal flush, even breaking up a pair Four to a flush with no pair. Four to an outside straight with no pair.

The player will sometimes switch with any of the following:

Four to a flush with a low pair (depends on the pair and dealer's up card). Four to an inside straight with no pair (depends on the inside straight and dealer's up card).

My apologies for not being more specific. In my view there, is not enough demand for the information to warrant doing a more detailed strategy.

Do not

switch with two pair or three of a kind.

If the casino allows switching two or more cards that option should never be taken.

Once the switch decision has been made the player can follow Caribbean Stud Poker strategy when deciding to raise or fold.

Odds

The following return table is based on the pay table above. Other pay tables are known to exist, which would change the odds.

Return Table Event Switch Pays

Combinations	Probability	Return	Player wins with royal flush	No 201	703909080	0.000001
0.000169	Player wins with straight flush	No 101	6591048240	0.000008	0.000795	Player wins with four of a kind
No 41	118962303600	0.000142	0.005826	Player wins with full house	No 15	698227961760
0.000834	0.01251	Player wins with flush	No 11	917993591760	0.001097	0.012062
Player wins with straight	No 9	1839831676200	0.002198	0.019779	Player wins with three of a kind	No 7
9838202449440	0.011751	0.08226	Player wins with two pair	No 5	20496509853120	0.024482
0.122412	Player wins with pair or less	No 3	97623586047960	0.116608	0.349824	Dealer doesn't qualify
No 1	185955255229464	0.222117	0.222117	Tie	No	

0 12240105192 0.000015 0 Player folds No -1 339591911883840 0.40563 -0.40563 Player loses No -3 109793339508384 0.131144 -0.393433 Player wins with royal flush Yes 200 2650657380 0.000003 0.000633 Player wins with straight flush Yes 100 24129845136 0.000029 0.002882 Player wins with four of a kind Yes 40 0 0 0 Player wins with full house Yes 14 0 0 0 Player wins with flush Yes 10 3022953154968 0.003611 0.036108 Player wins with straight Yes 8 3012064741860 0.003598 0.028782 Player wins with three of a kind Yes 6 0 0 0 Player wins with two pair Yes 4 0 0 0 Player wins with pair or less Yes 2 5747378958780 0.006865 0.01373 Dealer doesn't qualify Yes 0 14509998995172 0.017332 0 Tie Yes -1 1981751652 0.000002 -0.000002 Player folds Yes -2 37230605388900 0.044471 -0.088941 Player loses Yes -4 6750562960512 0.008063 -0.032253 Total 837195681722400 1 -0.010372

The lower right cell shows a house edge of 1.04%.

After

possibly switching and raising, the average final bet, including the switching fee, will be 2.183772 units. The element of risk is thus 0.475%. On average the player will switch 8.4% of the time.

At Internet casinos using Galewind Software there are some rule changes. There the player may switch one to five cards, for the price of one ante per card, and a full house pays 6 instead of 7. Under those rules the house edge is 1.204%, the average final wager is 2.184 units, and the element of risk is 0.55%.

Side

Bet

I indicate the odds of the side bet in my Caribbean Stud Poker section. Some casinos have been known to base the side bet on the hand after switching. This can be a very good rule for the player. However, if you see it, you're on your own.

Belgium

Variant

In Belgium the player is allowed to switch a card, but if he does, he forfeits his option to fold. That version of the rules is addressed in my section on Belgium Variant of Oasis Poker.

Nicaragua Variant

Oasis Poker is very popular in Nicaragua. It seems to have more placements than any other game. However, they call it Caribbean Stud Poker. The pay table is the standard one for the original hand. However, it is depressed if the player switches a card, which still costs the price of the Ante bet.

This variant has never been analyzed, as far as I know.

Nicaragua Variant Pay

Table Hand Original

Hand After

Discard Royal flush 100 50 Straight flush 50 20 Four of a kind 20 10 Full house 7 5 Flush 5 4 Straight 4 3 Three of a kind 3 3 Two pair 2 2 All other 1 1

As a variant of the Nicaragua variant, the Palms casino in Managua lets the player buy a sixth card for the price of the Ante, as opposed to discarding. This, too, has not been analyzed (sorry).

Finland Variant

At the Casino Helsinki the following rule changes are followed:

The player may exchange only one card from his hand with cost of 1 x ante.

If the dealer doesn't qualify player may exchange one card from the dealers hand (see Russian Poker above) to make the dealer to qualify.

Jackpot Bonus
side bet available.
Jackpot Bonus payout
Royal Flush: Jackpot (minimum amount
€20,000)
Straight Flush: 20% of the jackpot
Four of a kind: 250 for 1
Full House: 150
for 1
Flush: 100 for 1
Straight: 50 for 1

Uso de cocaína en Irlanda: una emergencia de salud pública

El uso de cocaína en Irlanda ha aumentado significativamente en los últimos años, convirtiéndose en una emergencia de salud pública. A medida que récords de drogas ingresan al país, las plataformas de redes sociales y los servicios de mensajería encriptada facilitan el mercado de distribución. La cocaína se ha vuelto cada vez más popular entre todos los grupos de edad, lo que ha provocado una serie de problemas de salud y mental.

La historia de Patrick

Patrick Murphy, de 26 años, lucha contra su adicción a la cocaína después de que el uso de la droga destruyera su vida en solo siete años. Comenzó a usar cocaína cuando tenía 19 años y rápidamente se enganchó. Perdió su trabajo, su relación y su hogar, y terminó viviendo en un furgón mientras seguía usando la droga. Después de ocho meses en un centro de tratamiento de drogas y alcohol, Murphy dice que es parte de una nueva generación de usuarios de cocaína en Irlanda.

Un problema generalizado

El uso de cocaína no solo afecta a los jóvenes, sino que también se está volviendo cada vez más común en grupos de mayor edad. Los expertos advierten sobre los riesgos para la salud asociados con el uso de cocaína, incluidos derrames cerebrales, latidos cardíacos irregulares y problemas de salud mental graves. A medida que el uso de cocaína continúa aumentando, los expertos instan al gobierno a abordar la crisis y brindar asistencia a aquellos que luchan contra la adicción.

Año Nuevos casos de tratamiento de cocaína

2024 1,258

2024 1,876

2024 2,464

2024 3,352

2024 4,284

2024 5,233

2024 6,636

Apoyo y tratamiento

Existen recursos disponibles para aquellos que luchan contra la adicción a la cocaína. Los centros de tratamiento como Coolmine ofrecen apoyo y asesoramiento a personas de todas las edades. Además, las líneas de ayuda nacionales están disponibles para brindar asistencia y recursos a aquellos que buscan ayuda.
