SlackFaq's

Highlining is a slackline discipline that is practiced at great heights, between mountains, buildings, bridges or whatever.

It is a great 3 challenge and a slackline discipline in which the mental game and mindset are far more important than the technical and 3 physical ability.

To really know what is highlining you probably have to try to stand on one or, maybe, if you 3 get to see quite decent slackliners crumble when facing this new context and challenge, you'll get a pretty close idea 3 of what it means for the one on the line.

This form of slackline provides an incredible adrenaline rush when tried 3 for the first time and has a great impact on the spectators as well.

With the exception of highline freesolo, where 3 the athlete is purposely unsafe, the highliner is permanently secured by a harness, attached to the main slackline line and, 3 at the same time, to a lifeline, called the backup.

On this picture we can clearly see the main line, the 3 backup, and the leash that connects the harness to both of them.

Despite the fact that accidents are potentially fatal and 3 that highlining deaths have happened, statistics show that highlining has become a really safe sport if practiced according to safety 3 standards.

Nowadays highline systems are redundant and unlike slacklining close to the ground, the highliner simply falls into the air if 3 mis-stepping with almost no risk of injury.

What looks scary and dangerous from the outside has become a really safe sport 3 with almost no limits.

What is Highlining: the definition and it's types

When we 3 speak of highline, we speak about walking slacklines that are rigged on such a height that it would be lethal 3 to fall off.

In this kind of slacklining the athlete is attached by the harness to the slackline, which ensures that 3 he is supported in the event of a fall.

There is a sub-category of highlines, called midlines .

Those are highlines that 3 are safer to walk with a harness but that are still rather close to the ground – often about 10-15m 3 heigh.

Midlines are less intimidating than highlines but in reality more dangerous, as the athlete – in the

unlikely case of 3 a mainline failure – could potentially touch the ground.

What is Highlining FreeStyle?

In this recent way of experiencing highline, athletes perform 3 spectacular tricks on the slackline. They bounce on the line and then enchain a series of moves, taking advantage of the 3 momentum.

The combinations can be endless and include shoulder stands, handstands, dynamic mounts and rolls among other crazy stunts.

Highline FreeSolo

What defines Highline Free solo is that highliner is simply walking unsecured.

In this regard the risk 3 of death is always present and the slightest mistake can be fatal.

It is not a practice that, impressive as it 3 may be, should be encouraged or celebrated.

Slacktivity refrains from this practice and supports no athletes who are into highline free 3 soloing.

The Security Basics

Highline rigging is a complex task that should always be performed or accompanied by experienced riggers.
