### **Cámara de Comercio de Nashville explora el potencial de la inteligencia artificial**

La Cámara de Comercio del Área de Nashville, Tennessee, ha convocado a una reunión anual de líderes empresariales locales para abordar un tema moderno: la inteligencia artificial.

El objetivo es desmitificar la tecnología para los cerca de 2000 miembros de la cámara, especialmente las pequeñas empresas.

Ralph Schulz, director ejecutivo de la Cámara, afirmó que "la gente no desconfía" de la inteligencia artificial, sino que "no tiene claro el uso potencial que le puede dar".

### **El impacto limitado de la inteligencia artificial en la economía**

La inteligencia artificial generativa cautivó la imaginación de empresas y trabajadores con su capacidad para responder preguntas, redactar párrafos, escribir código y crear imágenes.

Sin embargo, hasta ahora el impacto ha sido limitado. Aunque la adopción de la inteligencia artificial va en aumento, tan solo un cinco por ciento de las empresas de todo el país utilizan esta tecnología.

Muchos economistas predicen que todavía faltan años para que se pueda medir el impacto de la inteligencia artificial generativa en la actividad económica. Pero aseguran que el cambio llegará.

## **Pocas empresas pequeñas están utilizando la inteligencia artificial**

Algunas de las empresas más grandes están encontrando usos para la inteligencia artificial y invirtiendo dinero y tiempo para desarrollar más.

Sin embargo, muchas empresas más pequeñas apenas están empezando a incursionar en la tecnología, si es que llegan a utilizarla.

"Los mejores y los más grandes ya están trabajando en su implementación y sacándole provecho, pero la curva de adopción es muy incipiente", afirmó Carlsson-Szlezak.

## **Desafíos en la implementación de la inteligencia artificial**

La ciberseguridad es importante en el sector de Win-Tech, por eso debe tener cuidado con la información que introduce en los modelos de inteligencia artificial.

Además, no ha encontrado un lugar para la tecnología en la línea de producción, donde los maquinistas fabrican piezas de aluminio y titanio a la medida para la industria de defensa.

"Todavía no hay muchos casos de uso en la línea de producción", afirmó Giddens.
