Our journey began several years ago, and since then, we have learned a lot and grown tremendously.

In this engaging account, you will learn about the twists and turns we experienced while building our empire from scratch. We will share insights into our founder's tale, our company's growth, challenges overcome, successes achieved, and future aspirations. Get ready to embark on a captivating journey with Pixbet.

### Founder's Story

Meet our founder and visionary, Caio Aguiar, a passionate entrepreneur who identified a lucrative niche in the Brazilian market during the early 2010s. Sports betting was gaining popularity, and Brazilian enthusiasts craved a safe, user-friendly, and legal online platform for sports prediction and gambling. Mr. Aguiar recognized a golden opportunity to cater to Brazil's colossal gaming community.

Driven by sheer determination, Mr. Aguiar assembled a talented team of experts specializing in communications, finance, programming, marketing psychology, and legal aspects. These diverse individuals shared a vision of creating an unparalleled online environment for sports enthusiasts, as specified by the Constitution and Statutes of Pixbet.

### Initial Obstacles

As any startup confronts, we faced numerous challenges during the early days. Building an exceptional team and earning the trust of investors were significant accomplishments. Being a new business in a competitive market required us to differentiate ourselves through unprecedented services.

Moreover, Pixbet strives to forge partnerships with national and foreign organizations. By sponsoring reputable sporting events and teams, the community recognized our mission and valued responsible gaming.

Ambition, prudence, and technology usage paved the road to success for Pixbet. By adapting to the times, our website and intuitive app effectively solidified our brand, showcasing our forward-thinking approach. We maintained a steady course and invested in modern web designs, mobile-friendly systems, advanced AI security, convenient banking options, as well as user-friendly functionality. Understanding customers' desires is essential, so we provide exceptional support and respond thoughtfully to feedback. We achieved phenomenal numbers across Google, app shops, and our platform through active social networking. Remarkable growth, invention, alliances, and a committed staff have all combined to make the corporation prosper since January 2024.

Over six million active and Latin American clients have downloaded our applications from digital stores. Evolution and advancements shaped the technology of sportsbooks. Pixbet leads the market and focuses on the most significant variables to cement our foothold. Where could we make considerable development strides? We address client concerns cleverly by presenting banners with upcoming bids and presenting promotions and jackpots clearly. Here comes webmaster assistance a reality, boosting income activity after incorporating the Content app within a mobile counterpart officially via Google Play. Here, Pixbet has a record 34% increase in Pixbet impressions on both platforms after eight months of testing compared to historical periods, summing up various insights on the business insights from Google Ads. Before December of 2024, they had 61,330,895 conversions. We put our seal of approval on every page saying who approved it. Content can be read with minimal interruptions in our modern structure. Mobile and web templates for Pixbet were developed. A list of the game types included, comprising one page of each accessible Pixbet betting app. Sliding forms provide all the same entertainment and content that animated screens would. Our expert content hub showcased everything a spectator would find intriguing about sportsbooks in sleek, current full screen touch banners. While remaining consistent with style on other pages, extra promotions caught the reader's eye. Since animations required more time and system resources, Pixbet turned them into animated games. Currently, you may register directly on Pixbet's homepage and apps. Along with the redesign, we introduced animated sites. Here are snapshots of our first animated banner as homepage adornments. A/B testing and automating internal communications reduced customer service timing from seven days to one. Automation continues dominating Pixbet. Self-learning AI uses robotic work transparency models powered directly from the BI's platform for instant and common Tier 1 voicebot inquiries from our virtual assistants. Real humans helped Tier 2 and 3. Because our internal assistance team had expertly responded to our most valuable queries (lead scoring model) and second-screen content without leaving the assistance app, boosting effectiveness. Brazilian A/B Testing took approximately seven days when our communication volume was significant among departments. We hired overseas providers, totaling nearly R\$140,000 per month. Today this A/B test is automatic and generates more effective outlandish than previously MV, achieving 3x cost-effectiveness, based on in-house developments and third-party providers. Reduced cost! In beta testing and learning from customer responses and A/B voice AI tests with impressive 5% engagement, I gave the green light to leave. Given the chance Pixbet has to monetize audio, as websites do, ad auctions, from our AI interfaces, and business-to-business 28, A/B, AI testing scenarios were enabled throughout the last quarter of the World Cup. GPT3 Chat Bot Development Since over 904 B DC's of WhatsApp use Android, they still leverage webcore's Droid 2 for improved audio ad experiences. We reinvented our Tier 1 voicebot of 65 human operators working part-time on Zendesk live chat (55 Android app, four iOS HH) during the World Cup month. After three months following Pixbet's R\$9 million dollar stake in iSpeech (\$1,000 daily), R\$6M went the remaining cost to iSpeech as USD 150K until R\$5.8 million is converted back and that contract should close because converting will no longer happen. Earnings increased after app auto reply on Zendesk. Costs total million USD for Pixbet's iSpeech-Chat incorporation via APIs. We pay R\$1,000 a day to our contact center.

Instead of using Pixbet, Pixbet's audio solution results directly from self-learning transcribing AI using resources based on 1Communicate resources used previously with in A/B Android instant games developed at Riskapplytics. As a unicorn Pixbet customer, a GPT, 3 Chat flows topped in English and invoca bot in one specific case using Zendesk when opening and returning thousands of tickets causing ZAT or stress, causing disaster, in some cases losing essential logs when the system can sometimes not

bring forward complete details from an external URL. The results arrived even much faster. Since in this situation, there remained, only five operatives in Pixbet in Zendesk that resulted in 15 tickets automatically answered totaling 16 that month for Pixbet. After integrating it with Braze and others, from millions, including cases of human trafficking used internally to hire iOperatora minimum of 13 countries for live interviews as ZOomy (Video) agents based in Ukraine, Colombia, Chillys comos Brazil. After training people internally, there could be invitations from Mexico, allowing another country. The model used was Auxbe\_mma in Spanish for all parts of LatAm, Central America, Espiia Intelligence's Native and English agents have undergone previous tests because a total of 80 Native Speakers in 8 countries will improve both in-house WA or Zendesk-connected invoca specialist in T1. So more Pix Bet Latin American crew from eight different countries - - Mexico, Paraguay, Peru, Chile, Argentina, Ecuador, Colombia - increased and reduced more substantial delays so hiring could focus exclusively on Native Speakers for escalations in high-issues as managing A/ tests + monitoring the live agents already fully specialized in dozens of low languages in Latin America for Pixbet when contacted, and Invoca managed various platforms. Afterward, in addition to Chatbot Tier 1 in case AI didn't respond - which significantly minimized the A/B, testing took off and expanded until Version. This e-mail list shared Pix\_ English Docs, Gloss, about our testing flows set by Gpt, including video stories. The first Braze version is part of our low logic for Latin expansion along with flows Gpt to ensure they can communicate in person (Tier 0 bot) or on the carts using Whatsapp bubbles in Tier 1 on different topics/episodes. In case one of them doesn't understand, the funnels get escalated - though most likely auto-ticketing for a fast forward to Tiera 1or customer Tier 0. Besides granting hundreds of hours of process intel, another advantage provided by ISOLated Channels AI - UH Natives Specialists that Braze helps identify low effort ones from average LTV Fbit customers since those would need to migrate alongside other technology - aside from Braze; others enabled auto-response carousels like Facebook and G-Pay (Google). A Pixbet English self-help for the Zendesk team addressed the issue. Unlike at the beginning of October, no AI English can translate anything as good as Gpt3 when writing stories alone or understanding questions, translating texts needed by your content assistants. ## Jakkai Siributr: tejiendo voces no escuchadas en la frontera Tailandia-Myanmar

El artista tailandés Jakkai Siributr vive a pocas horas del campo de refugiados Kounng Jor, en la frontera entre Tailandia y Myanmar. Sin embargo, no fue hasta una visita en 2024 cuando supo de la existencia de los refugiados Shan que allí residen.

Esta visita inspiró un proyecto colaborativo de bordado, en el que participaron 20 niñas y mujeres de la etnia Shan, residentes en el campamento en el norte de Tailandia. Fueron invitadas a coser

imágenes y palabras de su elección.

Los trabajos de Siributr tratan de traer al primer plano voces no escuchadas o asuntos poco comentados

## **Un proyecto colaborativo con refugiadas Shan**

Siributr se sorprendió al descubrir la existencia de estos refugiados Shan. El campamento de Koung Jor ("Colina Feliz") alberga a más de 400 personas y es uno de los seis campamentos en la frontera Tailandia-Myanmar, donde viven más de 6.000 personas Shan, desplazadas por la violencia en el estado Shan de Myanmar en 2002.

Tailandia, que no es signataria del convenio de 1951 de la ONU sobre refugiados, no reconoce a estas personas como solicitantes de asilo, por lo que la mayoría de ellas son apátridas.

## **El arte como vehículo de concienciación**

La instalación de Siributr en el Palazzo Smith Mangilli Valmarana de Venecia forma parte de la exposición *The Spirits of Maritime Crossing*, una muestra de arte del sudeste asiático que explora temas de diáspora y desplazamiento. La exposición se enmarca en la Bienal de Bangkok, que tendrá lugar de octubre a febrero.

Siributr ha utilizado el bordado en varias ocasiones para llamar la atención sobre la situación de las personas desplazadas de Myanmar. Su obra de 2024, *The Outlaw's Flag*, es una serie de banderas de lugares imaginarios creados después de su visita a la ciudad de Sittwe, en el estado de Rakhine, donde se produjeron masacres de la minoría musulmana Rohingya.

"Creé estas banderas de lugares imaginarios a los que probablemente querrían ir [los refugiados]", explica Siributr.
