Roulette is one of the most legendary casino games around. For hundreds of years, the simple yet exhilarating gameplay has delighted players as they wait to see the final resting point of the ball on the roulette wheel. Once the game made the jump to the online realm, little changed in terms of how it functions. The saying, 'If it ain't broke, don't fix it,' comes to mind.

This logic has been utilised for live roulette. The standard game remains exactly the same as standard online roulette. The only differences you'll find in terms of gameplay are based on the roulette variation you choose. With that said, there are two games at 32Red that provide a fresh, exciting twist to the action: Speed Roulette and Double Ball Roulette.

Roulette

Randomized Social Casino Game Wins, 100% of the Time

When the roulette wheel

stops spinning, the winning sector is guaranteed to be a fully randomized selection.

Why? The CSGOFast free to play online casino operates on a provably fair play principle, backed by the SHA-2 algorithm.

Here's how it works:

At the start of a round,

the fair play service generates a random long number between 0 and 1

This figure is

then encrypted through the SHA-2 algorithm and displayed for all players to see

To close the round, the Service multiplies the posted number by the combined number of all bets tickets to decide the number of a winner

Watch Real -Time Randomization in

Action

Because CSGOFast can't know the final ticket number displayed before it's posted at the end of the round, it's impossible to influence the results. Don't believe us?

Watch your screen closely – each player can even watch the SHA-2 algorithm play out in real time!
